

***TwinLife* data available now!**

What is *TwinLife*?

- DFG-funded long-term project
- *Aim*: The study of genetic and social causes of life chances and social inequality
- *Design*: genetically informative, longitudinal, cross-sequential Extended Twin Family Design
- Social inequality conceptualized as a multi-dimensional phenomenon including six inequality domains
- Detailed assessment of a variety of environmental factors

How do you get access to the data?

- First *TwinLife* dataset can be obtained via the GESIS Data Catalogue: <http://dx.doi.org/10.4232/1.12888>
- It contains data from the first face-to-face survey for the full sample including 4,097 twin families
- Variables and instruments are documented here: <https://paneldata.org/twinlife>
