Contents

1 How to use the codebook 8

2 Study description 8

3 Data collection 7 (F2F 4) 8

4 Identifiers: IDs on wave, family, household and invidual level 8
fid – family ID (scientific use file) . . . 10
hid_7 – household ID wave-specific (scientific use file) (F2F 4) . . . 10
pid – person ID (scientific use file) . . . 10
wid – data collection ID - consecutively numbered (gen) . . . 11

5 Identifiers: Indicator and sample variables 11
cgr – twin birth cohort . . . 11
ptyp – type of respondent . . . 12
ptyp_hq – type of respondent for household questionnaire (gen) . . . 12
wav0100 – subsample (gen) . . . 13
wav0200 – survey wave (gen) . . . 13
wav0300 – part of the survey wave (gen) . . . 14
wav0400 – wave (wav0200, wav0300, wav0100 combined) . . . 14

6 Socio-demographics 15
age0100 – age in years on the date of the family questionnaire (gen) . . . 15
age0100t – age twins in years on the date of the family questionnaire (gen) . . . 15
age0100s – age sibling in years on the date of the family questionnaire (gen) . . . 16
age0101 – age in months on the date of the family questionnaire (gen) . . . 17
age0200 – age in years on 01 January of survey year of subsample (gen) . . . 17
age0201 – age in months on 01 January of survey year of subsample (gen) . . . 18
ewi – Eastern or western federal state (federal state indicator) (gen) . . . 18
gkpol_r – community size classification (political), 4 groups (gen) . . . 19
sex – sex . . . 20

7 Family structure and household characteristics 20
fhc – number of households belonging to the family (gen) . . . 20
fpr0107 – relation to the twins . . . 21
hlt – twin1 lives in household (gen) . . . 21
hlu – twin2 lives in household (gen) . . . 22
hls – sibling lives in household (gen) . . . 22
hlf – father lives in household (gen) . . . 22
hlg – stepfather lives in household (gen) . . . 23
hlm – mother lives in household (gen) . . . 23
hln – stepmother lives in household (gen) . . . 23
hpc – number of persons belonging to the household (gen) . . . 24
liv0210 – housing conditions of the twins (gen) . . . 24
liv0410 – household type (gen) . . . 25
liv0700 – Internet access available in the household (hh) . . . 25

8 Marital status 26
fam0100 – marital status (>= 16 yr) . . . 26
fam0200 – permanent partnership (>= 16 yr) . . . 27

fam0300 – sex of partner (>= 16 yr) 27

9 Migration and citizenship **28**
mig0520 – german citizenship available (gen) 28
mig0620 – German citizenship since (year) (gen) 28
mig2000 – country of birth (gen) 29
mig2001 – born in the GDR (gen) 30
mig2100 – country of birth of respondent's mother (gen) 31
mig2101 – born in the GDR - respondent's mother (gen) 32
mig2200 – country of birth of respondent's father (gen) 33
mig2201 – born in the GDR - respondent's father (gen) 34
mig3000 – country of birth - extended (gen) 34
mig3100 – country of birth of respondent's mother - extended (gen) 35
mig3200 – country of birth of respondent's father - extended (gen) 36
mig4000 – migration background (t,u,s, up to the 3rd generation) (gen) 37
mig4100 – migration background (up to the 2nd generation) (gen) 38

10 Zygosity questionnaire **38**
zyg0102 – zygosity: result questionnaire and DNA in F2F1 (gen) 38
zyg0112 – zygosity: result questionnaire and DNA in F2F1 & F2F3 (gen) 39

11 Educational attainment and success **40**
cer0001 – participation in the report card module (gen) 40
cer1001 – photo: consent photo report card 40
cer1001t – photo: consent photo report card (m/f/n/g, t < 18 yr.) 41
cer1001u – photo: consent photo report card (m/f/n/g, u < 18 yr.) 41
cer1001s – photo: consent photo report card (m/f/n/g, s < 18 yr.) 42
cer1002 – photo: consent photo report card (gen) 42
cer1004t – interview: math grade of last report card twin 1 43
cer1004u – interview: math grade of last report card twin 2 43
cer1004s – interview: math grade of last report card sibling 44
cer1005t – interview: german grade of last report card twin 1 44
cer1005u – interview: german grade of last report card twin 2 44
cer1005s – interview: german grade of last report card sibling 45
cer1006t – interview: school class of last report card twin 1 45
cer1006u – interview: school class of last report card twin 2 46
cer1006s – interview: school class of last report card sibling 46
cer1007t – interview: type of school of last report card twin 1 46
cer1007u – interview: type of school of last report card twin 2 47
cer1007s – interview: type of school of last report card sibling 48
cer1010t – last report card: type of report card (m/f/n/g) 48
cer1010u – last report card: type of report card (m/f/n/g) 49
cer1010s – last report card: type of report card (m/f/n/g) 49
cer1013 – interview: annual or final report card (int.) 49
cer1400 – interview: math grade of last report card 50
cer1500 – interview: german grade of last report card 50
cer1600 – interview: school class of last report card 51
cer1700 – interview: type of school of last report card 51
cer4001 – last report card: report card at hand - CAPIbyPhone 52
cer4001t – last report card: report card at hand - CAPIbyPhone (m/f/n/g) 52
cer4001u – last report card: report card at hand - CAPIbyPhone (m/f/n/g) 53

cer4001s – last report card: report card at hand - CAPIbyPhone (m/f/n/g) 53
cer4004t – last report card: maths grade - CAPIbyPhone (m/f/n/g) 54
cer4004u – last report card: maths grade - CAPIbyPhone (m/f/n/g) 54
cer4004s – last report card: maths grade - CAPIbyPhone (m/f/n/g) 55
cer4005t – last report card: german grade - CAPIbyPhone (m/f/n/g) 55
cer4005u – last report card: german grade - CAPIbyPhone (m/f/n/g) 56
cer4005s – last report card: german grade - CAPIbyPhone (m/f/n/g) 56
cer4006t – last report card: class - CAPIbyPhone (m/f/n/g) 56
cer4006u – last report card: class - CAPIbyPhone (m/f/n/g) 57
cer4006s – last report card: grade - CAPIbyPhone (m/f/n/g) 57
cer4007t – last report card: type of school - CAPIbyPhone (m/f/n/g) 57
cer4007u – last report card: type of school - CAPIbyPhone (m/f/n/g) 58
cer4007s – last report card: type of school - CAPIbyPhone (m/f/n/g) 59
cer4010t – last report card: type of report card - CAPIbyPhone (m/f/n/g) 59
cer4010u – last report card: type of report card - CAPIbyPhone (m/f/n/g) 60
cer4010s – last report card: type of report card - CAPIbyPhone (m/f/n/g) 60
cer4013 – last report card: type of report card CAPIbyPhone (m/f/n/g) 61
cer4400 – last report card: maths grade - CAPIbyPhone 61
cer4500 – last report card: german grade - CAPIbyPhone 61
cer4600 – last report card: grade - CAPIbyPhone 62
cer4700 – last report card: type of school - CAPIbyPhone 62
eca0100 – highest degree of school: type (>= 15 yr) 63
eca0102 – no school degree: type of last school (>= 15 yr) 63
eca0104 – school of general education: year of graduation (>= 15 yr) 64
eca0105 – highest educational degree: final grade (>= 15 yr) 65
eca0108 – ISCED 1997 (International Standard Classification of Education) (gen) . 65
eca0109 – CASMIN educational classification (gen) 66
eca0130 – highest degree of school (gen) 67
eca0200 – type of vocational training or university degree/diploma/qualification(>= 15 yr) 68
eca0201 – year of vocational training or university degree/diploma/qualification(>= 15 yr) 69
eca0205 – ISCO-08 2-digit based on eca0202 - occupational qualification (gen) . . 69
eca0207 – ISEI based on eca0205 (International Socio Economic Index) (gen) . . . 70
eca0208 – SIOPS based on eca0205 (Standard Int. Occupational Prestige Scale) (gen) 71
eca0220 – further vocational or university degree y/n (> = 15 y.) 72
eca0221 – further vocational or university degree 72
eca0230 – highest vocational or university degree (gen) 73
eca0600t – recommendation for secondary school twin 1 (m/f/n/g) 74
eca0600u – recommendation for secondary school twin 2 (m/f/n/g) 74
eca0600s – recommendation for secondary school sibling (m/f/n/g) 75
eca0601t – transition decision twin 1 (m/f/n/g) 75
eca0601u – transition decision twin 2 (m/f/n/g) 76
eca0601s – educational decision siblings (m/f/n/g) 76
eca0700t – desired school-leaving qualification twin 1 ((m,f,n,g), twin<=15 yr) . . . 77
eca0700u – desired school-leaving qualification twin 2 ((m,f,n,g), twin<=15 yr) . . 77
eca0700s – desired school-leaving qualification sibling ((m,f,n,g), sib<=15 yr) . . . 78
eca0701t – probability of twin 1 attaining desired school-leaving qualification (m/f/n/g) 78
eca0701u – probability of twin 2 attaining desired school-leaving qualification (m/f/n/g) 79
eca0701s – probability of sibling attaining desired school-leaving qualification (m/f/n/g) 80

eca0900 – new school graduation since last interview (>= 15 yr) 81
eca0901 – new school graduation: type (>= 15 yr) 81
eca0903 – new school graduation: month (>= 15 yr) 82
eca0904 – new school graduation: year (>= 15 yr) 82
eca0906 – new school graduation: average grade (>= 15 yr) 83
eca1000 – new vocational qualification or academic degree since last interview (>= 15 yr) 83
eca1001 – new vocational qualification: vocational training (>= 15 yr) 84
eca1002 – new vocational qualification: vocational school, business school (>= 15 yr) 84
eca1003 – new vocational qualification: schools for healthcare (>= 15 yr) 84
eca1004 – new vocational qualification: professional school, technical college (>= 15 yr) 85
eca1005 – new vocational qualification: training for civil servants (>= 15 yr) 85
eca1006 – new vocational qualification: occupational retraining (>= 15 yr) 86
eca1007 – new academic degree: university of applied sciences (>= 15 yr) 86
eca1008 – new academic degree: university, technical or other universities (>= 15 yr) 87
eca1009 – new academic degree: doctoral degree/habilitation (>= 15 yr) 87
eca1019 – new other qualification (>= 15 yr) 88
eca1098 – new qualification: do not know (>= 15 yr) 88
eca1099 – new qualification: not specified (>= 15 yr) 89
edu0100 – school attendance (t,u,s,p,q, <22 yr) 89
edu0100t – school attendance twin 1 (m/f/n/g) 90
edu0100u – school attendance twin 2 (m/f/n/g) 90
edu0100s – school attendance sibling (m/f/n/g) 90
edu0300 – In training (>= 15 yr) 91
edu0301 – type of training (>= 15 yr) 91
edu0303 – type of higher education (>= 15 yr) 92
edu0305 – education: further education (>= 15 yr) 92
edu0307 – type of vocational education (>= 15 yr) 93
edu0310 – twins same vocational education (t,u, >= 14 yr) 93
edu0311 – twins in the same university (t,u, >= 14 yr) 94
edu0312 – twins study of same subject (t,u, >= 14 yr) 94
edu0400 – type of school (> 10 yr) 95
edu0400t – type of school twin 1 (m/f/n/g) 96
edu0400u – type of school twin 2 (m/f/n/g) 96
edu0400s – type of school sibling (m/f/n/g) 97
edu0402 – school class (> 10 yr) 98
edu0511 – twins in the same school - self-report (t,u, > 13 yr) 98
edu0511t – twins in the same school - parent report (m/f/n/g) 99
edu0512 – twins in the same class - self-report (t,u, > 13 yr) 99
edu0512t – twins in the same class - parent report (m/f/n/g) 99
edu0521 – twins in same school since school class (t,u, >= 13 yr) 100
edu0523 – twins not in the same school since school class (t,u, >= 13 yr) 101
edu0531 – twins in the same class since school class (t,u, >= 13 yr) 101
edu0533 – twins not in the same class since school class (t,u, >= 13 yr) 102
edu0901 – school pressure/stress: tension (t,u,s, >= 13 yr) 102
edu0902 – school pressure/stress: difficulties falling asleep (t,u,s, >= 13 yr) 103
edu0903 – school pressure/stress: I react very irritably (t,u,s, >= 13 yr) 103
edu0904 – school pressure/stress:think about school problems in my free time(t,u,s,>=13yr) 104
edu0905 – school pressure/stress: I'm exhausted (t,u,s, >= 13 yr) 105

edu0906 – school pressure/stress: the pressure at school is too high (t,u,s, >= 13 yr) 105
edu0907 – school pressure/stress: no time for other things (t,u,s, >= 13 yr) 106
edu1000t – extent of school support (t, >=5 yr) 106
edu1000u – extent of school support (u, >=5 yr) 107
edu1000s – extent of school support (s, >=5 yr) 107
edu1001t – extracurricular activities: homework help (t, >=5 yr) 108
edu1001u – extracurricular activities: homework help (u, >=5 yr) 108
edu1001s – extracurricular activities: homework help (s, >=5 yr) 109
edu1002t – extracurricular activities: support groups (t, >=5 yr) 109
edu1002u – extracurricular activities: support groups (u,>=5 yr) 110
edu1002s – extracurricular activities: support groups (s, >=5 yr) 111
edu1003t – extracurricular activities: learning opportunities (t, >=5 yr) 111
edu1003u – extracurricular activities: learning opportunities (u, >=5 yr) 112
edu1003s – extracurricular activities: learning opportunities (s, >=5 yr) 112
edu1004t – extracurricular activities: projects (t, >=5 yr) 113
edu1004u – extracurricular activities: projects (u, >=5 yr) 113
edu1004s – extracurricular activities: projects (s, >=5 yr) 114
edu1005t – extracurricular activities: leisure activities (t,>=5 yr) 115
edu1005u – extracurricular activities: leisure activities (u, >=5 yr) 115
edu1005s – extracurricular activities: leisure activities (s, >=5 yr) 116
edu1006t – extracurricular activities: hot lunches (t, >=5 yr) 116
edu1006u – extracurricular activities: hot lunches (u, >=5 yr) 117
edu1006s – extracurricular activities: hot lunches (s, >=5 yr) 117

13 Employment status of household members 147
hpr0101 – employment status - kindergarten/child care institution . . . 147
hpr0102 – employment status - in school - first education path . . . 147
hpr0103 – employment status - training/uni./further education/other edu. . . . 148
hpr0104 – employment status - employed full-time . . . 148
hpr0105 – employment status - employed part-time - also in more than one job . . 149
hpr0106 – employment status - vocational training/apprenticeship/retraining . . 149
hpr0107 – employment status - marginally employed/mini-job/1-euro-job . . . 150
hpr0109 – employment status - voluntary military service . . . 150
hpr0110 – employment status - voluntary social/ecological year . . . 150
hpr0111 – employment status - unemployed/seeking employment . . . 151
hpr0112 – employment status - maternity/parental leave/special leave . . . 151

hpr0113 – employment status - housewife/househusband . . . 152
hpr0114 – employment status - in (early) retirement/occupational disability . . . 152
hpr0115 – employment status - partial retirement with zero working hours . . . 153
hpr0116 – employment status - not employed . . . 153
hpr0117 – employment status - in private care . . . 153
hpr0120 – employment status - other . . . 154
hpr0198 – employment status - don't know . . . 154
hpr0199 – employment status - not specified - refused to answer . . . 155

14 Employment status, current position and job-related burden 155
emp0200 – maternity/parental leave (>= 15 yr) . . . 155
emp0300 – registered as unemployed (>= 15 yr) . . . 156
emp0400 – employment (>= 16 yr) . . . 156
emp0503 – ISCO-08 of occ. activity, 2 digits based on emp0500 (gen) . . . 158
emp0505 – ISEI based on ISCO-08 (International Socio Economic Index) (gen) . 159

inc0313 – public services in hh: alimony payment for children (HH) . . . 181
inc0314 – publ. serv. in hh: alimony payment by former partner - not for children (HH) . . . 181
inc0315 – public services in hh: retirement pension (HH) . . . 182
inc0316 – public services in hh: sick pay (HH) . . . 182
inc0317 – public services in hh: alimony advance (HH) . . . 182
inc0318 – public services in hh: other benefits/allowances (HH) . . . 183
inc0397 – public services in hh: none (HH) . . . 183
inc0398 – public services in hh: don't know (HH) . . . 184
inc0399 – public services in hh: not specified - refused to answer (HH) . . . 184
inc0401 – monthly household net income of all hh members (inc0400 inc0404 manip.) (gen) . . . 185
inc0411 – net equivalent hh-income (modif.OECD scheme) using inc0401 inc0403 age0200 (gen) . . . 186
inc0420 – flag: yearly income integrated in inc0401 (gen) . . . 187
inc0422 – flag: multiple of child allowance specified in inc0401 (gen) . . . 187
inc0423 – flag: categorical income integrated in inc0401 (gen) . . . 188

16 Political orientation and participation 188
pop0100 – interest in politics (>= 10 yr) . . . 188
pop0200 – political activity: attending political meetings/discussions/protest (>= 10 yr) . . . 189
pop0201 – political activity: participating in (online) petitions (>= 10 yr) . . . 189
pop0202 – political activity: boycott of companies/products (>= 10 yr) . . . 190
pop0300 – participation in last parliamentary election (>= 18 yr) . . . 190
pop0301 – hypothetical participation in election (>= 10 yr) . . . 191
pop0302 – political leanings: party (>= 10 yr) . . . 191
pop0310 – political leanings: party (gen) . . . 192

17 Social networks 193
net0203 – number of close friends (>= 8 yr) . . . 193
net0209 – number of close friends in the household (>= 8 yr) . . . 193

18 Global life satisfaction 194
gls0100 – satisfaction: life almost ideal (>=16 yr) . . . 194
gls0200 – satisfaction: excellent life conditions (>=16 yr) . . . 194
gls0300 – satisfaction: satisfied with life (>=16 yr) . . . 195
gls0400 – satisfaction: most important wishes in life fulfilled (>=16 yr) . . . 196
gls0500 – satisfaction: would change almost nothing in new life (>=16 yr) . . . 196
gls0600 – satisfaction: life as favored (t,u,s, <= 15 yr) . . . 197
gls0700 – satisfaction: excellent things in life (t,u,s, <= 15 yr) . . . 197
gls0800 – satisfaction: happy with life (t,u,s, <= 15 yr) . . . 198
gls0900 – satisfaction: most important wishes in life fulfilled (t,u,s, <= 15 yr) . . . 199

gls1000 – satisfaction: same life in new life (t,u,s, <= 15 yr) 199

19 Burden and stress **200**
ebi0100 – parental stress: personally restricted (>= 16 yr) 200
ebi0101 – parental stress: relationship problems (>= 16 yr) 201
ebi0102 – parental stress: problems understanding (children) (>= 16 yr) 201
ebi0103 – parental stress: irritability (>= 16 yr) 202
ebi0104 – parental stress: parenting skills (>= 16 yr) 202
ebi0105 – parental stress: social isolation (>= 16 yr) 203

20 Subjective social status **204**
sss0100 – subjective social status, ladder 10 rungs (>=16 yr) 204

21 Subjective physical health **204**
she0100 – last 12 months: state of health (>= 10 yr) 204
she0100t – last 12 months: state of health twin 1 (m/f/n/g) 205
she0100u – last 12 months: state of health twin 2 (m/f/n/g) 205
she0100s – last 12 months: state of health sibling (m/f/n/g) 206

22 Objective physical health / Diagnoses **206**
bdy0100 – height in cm (>= 10 yr) 207
bdy0100t – height in cm twin 1 (m/f/n/g) 207
bdy0100u – height in cm twin 2 (m/f/n/g) 207
bdy0100s – height in cm sibling (m/f/n/g) 208
bdy0100_dht – difference between several height values (gen) 208
bdy0100_hgt – height in cm: corrected (gen) 209
bdy0100_nht – number of height values given (gen) 209
bdy0200 – weight in kg (>= 10 yr) 209
bdy0200t – weight in kg twin 1 (m/f/n/g) 210
bdy0200u – weight in kg twin 2 (m/f/n/g) 210
bdy0200s – weight in kg sibling (m/f/n/g) 211
bdy0200_dwt – difference between several weight values (gen) 211
bdy0200_nwt – number of weight values given (gen) 211
bdy0200_wgt – weight in kg: corrected (gen) 212
bdy0300 – BMI: corrected (gen) 212
bdy1001 – flag: peculiarities height (gen) 213
bdy1002 – flag: peculiarities weight (gen) 213
bdy1003 – flag: peculiarities BMI (gen) 214
dia3097 – diagnosis last 12 months: no illness/disease recorded (>= 15 yr) 214
dia3098 – diagnosis last 12 months: do not know (>= 15 yr) 215
dia3099 – diagnosis last 12 months: not specified (>= 15 yr) 215
dia3100 – diagnosis last 12 months: sleeping disorder (>= 15 yr) 216
dia3200 – diagnosis last 12 months: diabetes (>= 15 yr) 216
dia3300 – diagnosis last 12 months: respiratory illness (>= 15 yr) 216
dia3400 – diagnosis last 12 months: heart disease (>= 15 yr) 217
dia3500 – diagnosis last 12 months: cancer (>= 15 yr) 217
dia3600 – diagnosis last 12 months: stroke (>= 15 yr) 218
dia3700 – diagnosis last 12 months: migraine (>= 15 yr) 218
dia3800 – diagnosis last 12 months: high blood pressure (>= 15 yr) 219
dia3900 – diagnosis last 12 months: anxiety disorder (>= 15 yr) 219
dia4000 – diagnosis last 12 months: alcohol addiction (>= 15 yr) 220

dia4100 – diagnosis last 12 months: depressive disorder (>= 15 yr) 220
dia4200 – diagnosis last 12 months: joint disease (>= 15 yr) 221
dia4300 – diagnosis last 12 months: chronic back problems (>= 15 yr) 221
dia4400 – diagnosis last 12 months: physical disability (>= 15 yr) 222
dia4500 – diagnosis last 12 months: other physical or mental illness (>= 15 yr) . . 222
dia4700 – diagnosis last 12 months: ADHD/ADD (>= 15 yr) 223
dia5220 – diagnosis last 12 months: allergies (>= 16 y.) 223
dia5320 – diagnosis last 12 months: skin diseases (>= 16 y.) 224
dia5520 – diagnosis last 12 months: cholesterol (>= 16 y.) 224
dia5620 – diagnosis last 12 months: defective vision (>= 16 y.) 225
dia5720 – diagnosis last 12 months: reading/spelling disorder (>= 16 y.) 225
dia5820 – diagnosis last 12 months: dyscalculia (>= 16 y.) 225
dia5920 – diagnosis last 12 months: thyroid disease (>= 16 y.) 226
dia7000t – diagnosis last 12 months: respiratory illness twin 1 (m/f/n/g) 226
dia7000u – diagnosis last 12 months: respiratory illness twin 2 (m/f/n/g) 227
dia7000s – diagnosis last 12 months: respiratory illness sibling (m/f/n/g) 227
dia7097t – diagnosis last 12 months: no diseases twin 1 (m/f/n/g) 228
dia7097u – diagnosis last 12 months: no diseases twin 2 (m/f/n/g) 228
dia7097s – diagnosis last 12 months: no diseases sibling (m/f/n/g) 229
dia7098t – diagnosis last 12 months: don't know twin 1 (m/f/n/g) 229
dia7098u – diagnosis last 12 months: don't know twin 2 (m/f/n/g) 230
dia7098s – diagnosis last 12 months: don't know sibling (m/f/n/g) 230
dia7099t – diagnosis last 12 months: not specified twin 1 (m/f/n/g) 231
dia7099u – diagnosis last 12 months: not specified twin 2 (m/f/n/g) 231
dia7099s – diagnosis last 12 months: not specified sibling (m/f/n/g) 232
dia7100t – diagnosis last 12 months: allergies twin 1 (m/f/n/g) 232
dia7100u – diagnosis last 12 months: allergies twin 2 (m/f/n/g) 233
dia7100s – diagnosis last 12 months: allergies sibling (m/f/n/g) 233
dia7200t – diagnosis last 12 months: neurodermatitis twin 1 (m/f/n/g) 234
dia7200u – diagnosis last 12 months: neurodermatitis twin 2 (m/f/n/g) 234
dia7200s – diagnosis last 12 months: neurodermatitis sibling (m/f/n/g) 235
dia7300t – diagnosis last 12 months: defective vision twin 1 (m/f/n/g) 235
dia7300u – diagnosis last 12 months: defective vision twin 2 (m/f/n/g) 236
dia7300s – diagnosis last 12 months: defective vision sibling (m/f/n/g) 236
dia7400t – diagnosis last 12 months: physiological eating disorder twin 1 (m/f/n/g) 237
dia7400u – diagnosis last 12 months: physiological eating disorder twin 2 (m/f/n/g) 237
dia7400s – diagnosis last 12 months: physiological eating disorder sibling (m/f/n/g) 238
dia7500t – diagnosis last 12 months: motor dysfunction twin 1 (m/f/n/g) 238
dia7500u – diagnosis last 12 months: motor dysfunction twin 2 (m/f/n/g) 239
dia7500s – diagnosis last 12 months: motor dysfunction sibling (m/f/n/g) 239
dia7600t – diagnosis last 12 months: mental disability twin 1 (m/f/n/g) 240
dia7600u – diagnosis last 12 months: mental disability twin 2 (m/f/n/g) 240
dia7600s – diagnosis last 12 months: mental disability sibling (m/f/n/g) 241
dia7700t – diagnosis last 12 months: physical disability twin 1 (m/f/n/g) 241
dia7700u – diagnosis last 12 months: physical disability twin 2 (m/f/n/g) 242
dia7700s – diagnosis last 12 months: physical disability sibling (m/f/n/g) 242
dia7800t – diagnosis last 12 months: anxiety disorder twin 1 (m/f/n/g) 243
dia7800u – diagnosis last 12 months: anxiety disorder twin 2 (m/f/n/g) 243
dia7800s – diagnosis last 12 months: anxiety disorder sibling (m/f/n/g) 244
dia7900t – diagnosis last 12 months: social behavior disorder twin 1 (m/f/n/g) . . 244

dia7900u – diagnosis last 12 months: social behavior disorder twin 2 (m/f/n/g) . . 245
dia7900s – diagnosis last 12 months: social behavior disorder sibling (m/f/n/g) . . 245
dia8000t – diagnosis last 12 months: ADHD/ADD twin 1 (m/f/n/g) 246
dia8000u – diagnosis last 12 months: ADHD/ADD twin 2 (m/f/n/g) 246
dia8000s – diagnosis last 12 months: ADHD/ADD sibling (m/f/n/g) 247
dia8100t – diagnosis last 12 months: reading/spelling disorder twin 1 (m/f/n/g) . 247
dia8100u – diagnosis last 12 months: reading/spelling disorder twin 2 (m/f/n/g) . 248
dia8100s – diagnosis last 12 months: reading/spelling disorder sibling (m/f/n/g) . 248
dia8200t – diagnosis last 12 months: dyscalculia twin 1 (m/f/n/g) 249
dia8200u – diagnosis last 12 months: dyscalculia twin 2 (m/f/n/g) 249
dia8200s – diagnosis last 12 months: dyscalculia sibling (m/f/n/g) 250
dia8300t – diagnosis last 12 months: stuttering twin 1 (m/f/n/g) 250
dia8300u – diagnosis last 12 months: stuttering twin 2 (m/f/n/g) 251
dia8300s – diagnosis last 12 months: stuttering sibling (m/f/n/g) 251
dia8400t – diagnosis last 12 months: other diseases twin 1 (m/f/n/g) 252
dia8400u – diagnosis last 12 months: other diseases twin 2 (m/f/n/g) 252
dia8400s – diagnosis last 12 months: other diseases sibling (m/f/n/g) 253
dia9020t – diagnosis last 12 months: chronic diseases (twin 1) (m,f,g,n) 253
dia9020u – diagnosis last 12 months: chronic diseases (twin 2) (m,f,g,n) 254
dia9020s – diagnosis last 12 months: chronic diseases (sibling) (m,f,g,n) 254
dia9120t – diagnosis last 12 months: chronic disease - diabetes (twin 1) (m,f,g,n) . 255
dia9120u – diagnosis last 12 months: chronic disease - diabetes (twin 2) (m,f,g,n) . 255
dia9120s – diagnosis last 12 months: chronic disease - diabetes (sibling) (m,f,g,n) 256
dia9220t – diagnosis last 12 months: chronic disease - heart disease (twin 1) (m,f,g,n) 256
dia9220u – diagnosis last 12 months: chronic disease - heart disease (twin 2) (m,f,g,n) 257
dia9220s – diagnosis last 12 months: chronic disease - heart disease (sibling) (m,f,g,n) 257
dia9320t – diagnosis last 12 months: chronic disease - migraine (twin 1) (m,f,g,n) 258
dia9320u – diagnosis last 12 months: chronic disease - migraine (twin 2) (m,f,g,n) 258
dia9320s – diagnosis last 12 months: chronic disease - migraine (sibling) (m,f,g,n) 259
dia9420t – diagnosis last 12 months: chronic disease - epilepsy (twin 1) (m,f,g,n) . 259
dia9420u – diagnosis last 12 months: chronic disease - epilepsy (twin 2) (m,f,g,n) 260
dia9420s – diagnosis last 12 months: chronic disease - epilepsy (sibling) (m,f,g,n) 260
dia9520t – diagnosis last 12 months: other chronic disease (twin 1) (m,f,g,n) . . . 261
dia9520u – diagnosis last 12 months: other chronic disease (twin 2) (m,f,g,n) . . . 261
dia9520s – diagnosis last 12 months: other chronic disease (sibling) (m,f,g,n) . . . 262
dia9920t – diagnosis last 12 months: chronic disease - none of the above (twin 1) (m,f,g,n) 262
dia9920u – diagnosis last 12 months: chronic disease - none of the above (twin 2) (m,f,g,n) 263
dia9920s – diagnosis last 12 months: chronic disease - none of the above (sib) (m,f,g,n) 263
imp0100 – limited due to illnesses/diseases 264
imp0100t – twin 1 limited due to illnesses (m/f/n/g) 264
imp0100u – twin 2 limited due to illnesses (m/f/n/g) 264
imp0100s – sibling limited due to illnesses (m/f/n/g) 265

23 Health-related behavior **265**
doc0100 – visits to the doctor in the last 12 months (>= 16 yr) 265
doc0100t – twin 1 visit to the doctor in the last 12 months (m/f/n/g) 266
doc0100u – twin 2 visit to the doctor in the last 12 months (m/f/n/g) 267
doc0100s – sibling visit to the doctor in the last 12 months (m/f/n/g) 267

doc0101 – visits to the doctor in the last 12 months: frequency (>= 16 yr) 268
doc0101t – frequency: twin 1 visits to the doctor in the last 12 months (m/f/n/g) . 268
doc0101u – frequency: twin 2 visits to the doctor in the last 12 months (m/f/n/g) . 268
doc0101s – frequency: sibling visits to the doctor in the last 12 months (m/f/n/g) . 269
hbe0100 – smoking behavior (>= 16 yr) 270
hbe0101 – smoking behavior: age at beginning (>= 16 yr) 270
hbe0200 – alcohol consumption: age at beginning (>= 16 yr) 271
hbe0202 – excessive alcohol consumption: frequency (>= 16 yr) 271
hbe0210 – excessive alcohol consumption: beer - number of glasses (>= 16 yr) . . 272
hbe0220 – excessive alcohol consumption: wine - number of glasses (>= 16 yr) . . 272
hbe0230 – excessive alcohol consumption: high-proof alcohol - number of glasses (>= 16 yr) 273
hbe0240 – extent of alcohol consumption: beer (>= 16 yr) 273
hbe0241 – extent of alcohol consumption: wine, sparkling wine (>= 16 yr) 274
hbe0242 – extent of alcohol consumption: high-proof alcohol (>= 16 yr) 274
hbe0250 – alcohol consumption: impairment at work (>= 16 yr) 275
hbe0300 – medication with side-effects (>= 16 yr) 275
hbe0400 – preventive health care (>= 16 yr) 276

24 Sexual behavior **276**
seo0300 – sexual orientation (>= 16 yr) 277
seo1100 – consent question on sexuality (t,u,s,p,q >= 14 & <= 18 yr) 277

25 Emotional impairment **277**
emi0120 – psych. impairment (currently): little interest or pleasure (>=16 yr) . . . 277
emi0121 – psych. impairment (currently): dejection, hopelessness (>=16 yr) . . . 278
emi0122 – psych. impairment (currently): nervousness, anxiety (>=16 yr) 278
emi0123 – psych. impairment (currently): no control over worries (>=16 yr) 279
emi0124 – psych. impairment (currently): difficulty concentrating (>=16 yr) 279
emi0125 – psych. impairment (currently): difficulty focusing on goals (>=16 yr) . 280
emi0220 – psych. impairment (recents days): little interest or pleasure (<=15 yr) . 280
emi0221 – psych. impairment (recents days): dejection, hopelessness (<=15 yr) . . 281
emi0222 – psych. impairment (recents days): nervousness, anxiety (<=15 yr) . . . 281
emi0223 – psych. impairment (recents days): no control over worries (<=15 yr) . . 282
emi0224 – psych. impairment (recents days): difficulty concentrating (<=15 yr) . . 282
emi0225 – psych. impairment (recents days): difficulty focusing on goals (<=15 yr) 283

26 Internalizing problem behavior **283**
int0100 – I have frequent headaches/stomach aches (>= 10 yr) 283
int0100t – frequent headaches/stomachaches twin 1 (m/f/n/g) 284
int0100u – frequent headaches/stomachaches - twin 2 (m/f/n/g) 284
int0100s – frequent headaches/stomachaches sibling (m/f/n/g) 285
int0101 – I'm often worried (>= 10 yr) 285
int0101t – many worries, often depressed - twin 1 (m/f/n/g) 286
int0101u – many worries, often depressed - twin 2 (m/f/n/g) 286
int0101s – many worries, often depressed - sibling (m/f/n/g) 287
int0102 – I'm often unhappy or depressed (>= 10 yr) 287
int0102t – often unhappy, often cries - twin 1 (m/f/n/g) 288
int0102u – often unhappy, often cries - twin 2 (m/f/n/g) 288
int0102s – often unhappy, often cries - sibling (m/f/n/g) 289
int0103 – I'm nervous in new situations (>= 10 yr) 290

int0103t – nervous in new situations, loses self-confidence - twin 1 (m/f/n/g) . . . 290
int0103u – nervous in new situations, loses self-confidence - twin 2 (m/f/n/g) . . 291
int0103s – nervous in new situations, loses self-confidence - sibling (m/f/n/g) . . 291
int0104 – I have a lot of fears (>= 10 yr) . . . 292
int0104t – many fears, gets scared easily - twin 1 (m/f/n/g) . . . 292
int0104u – many fears, gets scared easily - twin 2 (m/f/n/g) . . . 293
int0104s – many fears, gets scared easily - sibling (m/f/n/g) . . . 293
int0105 – I'm usually on my own (>= 10 yr) . . . 294
int0105t – loner, mostly plays alone - twin 1 (m/f/n/g) . . . 294
int0105u – loner, mostly plays alone - twin 2 (m/f/n/g) . . . 295
int0105s – loner, mostly plays alone - sibling (m/f/n/g) . . . 295
int0106 – I have one or more good friends (>= 10 yr) . . . 296

tra0101 – transitions: moving out subj. rating (t,u,s) . . . 455
tra0101t – transitions twin 1: moving out parent subj. rating (m,f,n,g) . . . 456
tra0101u – transitions twin 2: moving out parent proxy rating (m,f,n,g) . . . 456
tra0101s – transitions sibling: moving out parent proxy rating (m,f,n,g) . . . 457
tra0200 – transitions: change from sec. school (t,u,s) . . . 458
tra0200t – transitions twin 1: change from sec. school (m,f,n,g) . . . 458
tra0200u – transitions twin 2: change from sec. school (m,f,n,g) . . . 459
tra0200s – transitions sibling: change from sec. school (m,f,n,g) . . . 459
tra0201 – transitions: change from sec. school subj. rating (t,u,s) . . . 460
tra0201t – transitions twin 1: change from sec. school parent subj. rating (m,f,n,g) 460
tra0201u – transitions twin 2: change from sec. school parent subj. rating (m,f,n,g) 461
tra0201s – transitions sibling: change from sec. school parent subj. rating (m,f,n,g) 461
tra0300 – transitions: dropping out from training/university (t,u,s) . . . 462
tra0300t – transitions twin 1: dropping out from training/university (m,f,n,g) . . . 463
tra0300u – transitions twin 2: dropping out from training/university (m,f,n,g) . . 463
tra0300s – transitions sibling: dropping out from training/university (m,f,n,g) . . 463
tra0301 – transitions: dropping out from training/university subj. (t,u,s) . . . 464
tra0301t – transitions twin 1: dropping out from training/uni parent subj. rating (m,f,n,g) . . . 465
tra0301u – transitions twin 2: dropping out from training/uni parent subj. rating (m,f,n,g) . . . 465
tra0301s – transitions sibling: dropping out from training/uni parent subj. (m,f,n,g) 466
tra0400t – transitions twin 1: enrollment (m,f,n,g) . . . 466
tra0400u – transitions twin 2: enrollment (m,f,n,g) . . . 467
tra0400s – transitions sibling: enrollment (m,f,n,g) . . . 467
tra0401t – transitions twin 1: enrollment parent subj. rating (m,f,n,g) . . . 468
tra0401u – transitions twin 2: enrollment parent subj. rating (m,f,n,g) . . . 468

tra0401s – transitions sibling: enrollment parent subj. rating (m,f,n,g) 469
tra0500 – transitions: change to sec.school (t,u,s, <= 14 yr) 470
tra0500t – transitions twin 1: change to sec.school (m,f,n,g) 470
tra0500u – transitions twin 2: change to sec.school (m,f,n,g) 471
tra0500s – transitions sibling: change to sec.school (m,f,n,g) 471
tra0501 – transitions: change to sec.school subj. rating (t,u,s, <= 14 yr) 471
tra0501t – transitions twin 1: change to sec.school parent subj. rating (m,f,n,g) . . 472
tra0501u – transitions twin 2: change to sec.school parent subj. rating (m,f,n,g) . 473
tra0501s – transitions sibling: change to sec.school parent subj. rating (m,f,n,g) . 473
tra0600 – self - starting a family (t,u,s) 474
tra0600t – transitions twin 1: starting a family (m,f,n,g) 474
tra0600u – transitions twin 2: starting a family (m,f,n,g) 475
tra0600s – transitions sibling: starting a family (m,f,n,g) 475
tra0601 – transitions: starting a family - subj. feeling (t,u,s) 476
tra0601t – transitions twin 1: starting a family - subj. feeling (m,f,n,g) 476
tra0601u – transitions twin 2: starting a family - subj. feeling (m,f,n,g) 477
tra0601s – transitions sibling: starting a family - subj. feeling (m,f,n,g) 478

39 COVID-19 supplementary survey: current socio-economic situation, behavior and health 478
cov0101 – corona disease in the household (>=16 yr) 478
cov0102 – corona quarantine in the household (>=16 yr) 479
cov0103 – corona vaccination obtained (>=16 yr) 479
cov0104 – full vaccination protection obatined (>=16 yr) 480
cov0105 – vaccine readiness (>=16 yr) 480
cov0110 – vaccine readiness (t,u,s, <=15 yr) 481
cov0200 – health: general health has worsened (>=16 yr) 481
cov0201 – health: diseases have worsened (>=16 yr) 482
cov0202 – health: avoided regular preventive medical checkups (>=16 yr) 482
cov0203 – health: avoided doctor visits for acute illnesses (>=16 yr) 483
cov0204 – health: surgery postponed (>=16 yr) 483
cov0299 – employment status (pandemic): self-employment (>=16 yr) 484
cov0300 – changes in employment status: training/study period extended (>=15 yr) 485
cov0303 – changes in employment status: business discontinued (>=18 yr) 485
cov0304 – changes in employment status: own company threatened in existence (>=18 yr) 485
cov0305 – changes in employment status: short-time work (>=16 yr) 486
cov0306 – changes in employment status: change of occupation (>=16 yr) 486
cov0307 – changes in employment status: further employment (>=16 yr) 487
cov0311 – changes in employment status: training/university dropout (>=16 yr) . 487
cov0312 – changes in employment status: dropout training /university (>=15 yr) . 488
cov0320 – changes in employment status: job loss (>=16 yr) 488
cov0400 – changes in occupational activity: work from home (>=16 yr) 489
cov0401 – changes in occupational activity: overtime work (>=16 yr) 489
cov0402 – changes in occupational activity: flexible working hours (>=16 yr) . . . 490
cov0403 – changes in occupational activity: scope of employment (>=16 yr) 490
cov0410 – difficulty: homeoffice (>=16 yr) 491
cov0500 – changes in income (>=16 yr) 492
cov0703 – have own children (t,u,s, >= 16 yr) 492
cov0704 – worries about future of children 493
cov0711 – form of teaching 493
cov0712 – self-assessment: learning performance 494

cov0720 – school-aged child present (>=16 yr) . . . 494
cov0721 – worries: lose touch (>=16 yr) . . . 494
cov0722 – worries: poorer school-leaving qualification (>=16 yr) . . . 495
cov0723 – worries: impaired development (>=16 yr) . . . 495
cov0724 – perception of competence: support in homeschooling (>=16 yr) . . . 496
cov0725 – utilization of support services (>=16 yr) . . . 496
cov0900 – impact of corona: health (>=16 yr) . . . 497
cov0901 – impact of corona: economic situation (>=16 yr) . . . 498
cov0902 – impact of corona: opportunities for education and training (>=16 yr) . . . 498
cov0903 – impact of corona: personal freedom (>=16 yr) . . . 499
cov0904 – impact of corona: social life (>=16 yr) . . . 499
cov0905 – impact of corona: health (<=15 yr) . . . 500
cov0906 – impact of corona: performance at school (<=15 yr) . . . 501

cov1401 – behavioral changes: shopping super markets (>=16 yr) . . . 518
cov1402 – behavioral changes: visiting public places/events (>=16 yr) . . . 519
cov1403 – behavioral changes: use of public transport (>=16 yr) . . . 520
cov1404 – behavioral changes: staying at home (>=16 yr) . . . 520
cov1405 – behavioral changes: visiting family (>=16 yr) . . . 521
cov1406 – behavioral changes: meeting with acquaintances and friends (>=16 yr) . . . 521
cov1407 – behavioral changes: washing hands (<=15 yr) . . . 522
cov1408 – behavioral changes: shopping supermarkets (<=15 yr) . . . 523
cov1409 – behavioral changes: visiting public places (<=15 yr) . . . 523

cov1410 – behavioral changes: use of public transport (<=15 yr) . . . 524
cov1411 – behavioral changes: staying at home (<=15 yr) . . . 524
cov1412 – behavioral changes: visiting family (<=15 yr) . . . 525
cov1413 – behavioral changes: meeting friends (<=15 yr) . . . 525
cov1500 – resilience: thoughts about changing difficult situations (>=16 yr) . . . 526
cov1501 – resilience: reactions under control (>=16 yr) . . . 527
cov1502 – resilience: further development through difficult situations (>=16 yr) . 527
cov1503 – resilience: compensating for setbacks (>=16 yr) . . . 528
cov1801 – positive PCR test (>=16 yr) . . . 528
cov1801t – positive PCR test twin 1 (m/f/n/g) . . . 529
cov1801u – positive PCR test twin 2 (m/f/n/g) . . . 529
cov1802 – positive PCR test month (>=16 yr) . . . 530
cov1802t – positive PCR test month twin 1 (m/f/n/g) . . . 530
cov1802u – positive PCR test month twin 2 (m/f/n/g) . . . 531
cov1803 – positive PCR test year (>=16 yr) . . . 532
cov1803t – positive PCR test year twin 1 (m/f/n/g) . . . 532
cov1803u – positive PCR test year twin 2 (m/f/n/g) . . . 532

40 Survey and module participation **533**
euek – respondent parents about child . . . 533
f2f_mcapi – participation CAPI (gen) . . . 533
f2f_mcasi – participation CASI (gen) . . . 534
f2f_mhh – participation hh questionnaire (gen) . . . 534
mod1002 – survey mode due pandemic (hh questionnaire) . . . 535
mod1003 – survey mode due pandemic (individual questionnaire) . . . 535

41 Interviewer variables **536**
iid – interviewer ID . . . 536
ini0100 – interviewer: year of birth . . . 536
ini0101 – interviewer: sex . . . 536
ini0102 – interviewer: educational qualification . . . 537
ini0103 – interviewer: year of joining survey institute . . . 537

42 Interviewer assessments **537**
iva0001 – who owns household (intr) . . . 538
iva0100 – dwelling is neat/messy (intr) . . . 538
iva0101 – home furnishings are simple/expensive (intr) . . . 539
iva0102 – dwelling is well-kept/neglected (intr) . . . 539
iva0103 – dwelling is cramped/spacious (intr) . . . 540
iva0104 – number of books in the household (intr) . . . 541
iva0400 – interference of parents in interview of twins/sibling (intr) . . . 541
iva0401 – interference of parents in tests of twins/sibling (intr) . . . 542
iva0402 – interference of children with each other in int./tests (intr) . . . 543
iva0403 – interference of parents with each other in int./tests (intr) . . . 543
iva0406 – frequency of disturbances during the interview . . . 544
iva0901 – type of building (intr) . . . 545
iva0902 – condition of the house (intr) . . . 545
iva0903 – safety assessment of the residential area (intr) . . . 546
iva0904 – description of the residential area (intr) . . . 546
iva0905 – environmental pollution in residential area (intr) . . . 547
iva1000 – household edited in previous wave (intr) . . . 548

iva1100 – ease of interview (intr) 548
iva1210 – technical problems during interview (intr) 549
iva1310 – attempts at identity fraud (intr) 549

43 Para data **550**
mon_fq – month family questionnaire was conducted (gen) 550
mon_hq – month household questionnaire was conducted (gen) 550
mon_pq – month individual questionnaire was conducted (gen) 550
yea_fq – year family questionnaire was conducted (gen) 551
yea_hq – year household questionnaire was conducted (gen) 551
yea_pq – year individual questionnaire was conducted (gen) 552
new – new respondent - first F2F interview (gen) 552
news – new sibling - first F2F interview (gen) 552

1 How to use the codebook

The codebook includes information and frequencies of all variables that are included in the Scientific Use File of TwinLife. The variables are sorted alphabetically within content-related chapters. The codebook documents the following information for these variables: variable name, variable label, question text (from the major survey instrument - although the question text is usually identical in all survey modes, it may differ in some cases), categories (including the value labels), frequencies, data collections the variable was surveyed in, filter conditions based on the instruments used for the variable, and sources for additional information. The variable label includes information on age groups and person types surveyed. This information serves as rough orientation; for detailed filter conditions of the variable within the instrument/questionnaire, please see the filter conditions documented below the frequency table. Please note: For metric variables or variables with many categories, no frequencies are documented (except for missing categories) in order to avoid long lists of categories. The codebook is based on cross-sectional data.

2 Study description

TwinLife is an interdisciplinary longitudinal study that combines perspectives of psychological and sociological theories with behavioral genetic research. The aim of TwinLife is to examine the interplay of the genetic and environmental mechanisms that influence social inequalities over the life course. The study focuses on education and academic performance, career and labor market attainment, integration and participation in social, cultural and political life, quality of life and perceived capabilities, physical and psychological health as well as behavioral issues and deviant behavior. Therefore, more than 4,000 mono- and dizygotic twin couples from four birth cohorts and their families are interviewed alternately in person and by telephone every year. The population of the TwinLife study are families with same-sex twins in Germany who were 5, 11, 17, and 22-24 years old at the first interview in 2014 or 2015. Thus, birth cohorts are defined as follows:
subsample A: - cohort 1: 2009 - cohort 2: 2003 - cohort 3: 1997 - cohort 4: 1990/1991
subsample B: - cohort 1: 2010 - cohort 2: 2004 - cohort 3: 1998 - cohort 4: 1992/1993
More detailed information you can find on our documentation website `https://www.twin-life.de/documentation/`.

3 Data collection 7 (F2F 4)

The field period for F2F 4 was from Nov 30, 2020 to April 20, 2021 (subsample A) and from Nov 29, 2021 to April 27, 2022 (subsample B). Sub-sample A includes 1,100 families. Subsample B includes 1,063 families. Thus, a total of 2,163 families participated in the F2F4 survey.
The target persons in F2F 4 include: - both twins - their parents or stepparents - one sibling (5 years or older) - partners of twins, provided the twins are at least 18 years old
For more information on the F2F 4 survey, see the Methodological Report `https://pub.uni-bielefeld.de/record/2990786`.

4 Identifiers: IDs on wave, family, household and invidual level

This chapter contains information on: identifier on family level; identifier on household level; identifier on individual level; wave identifier.

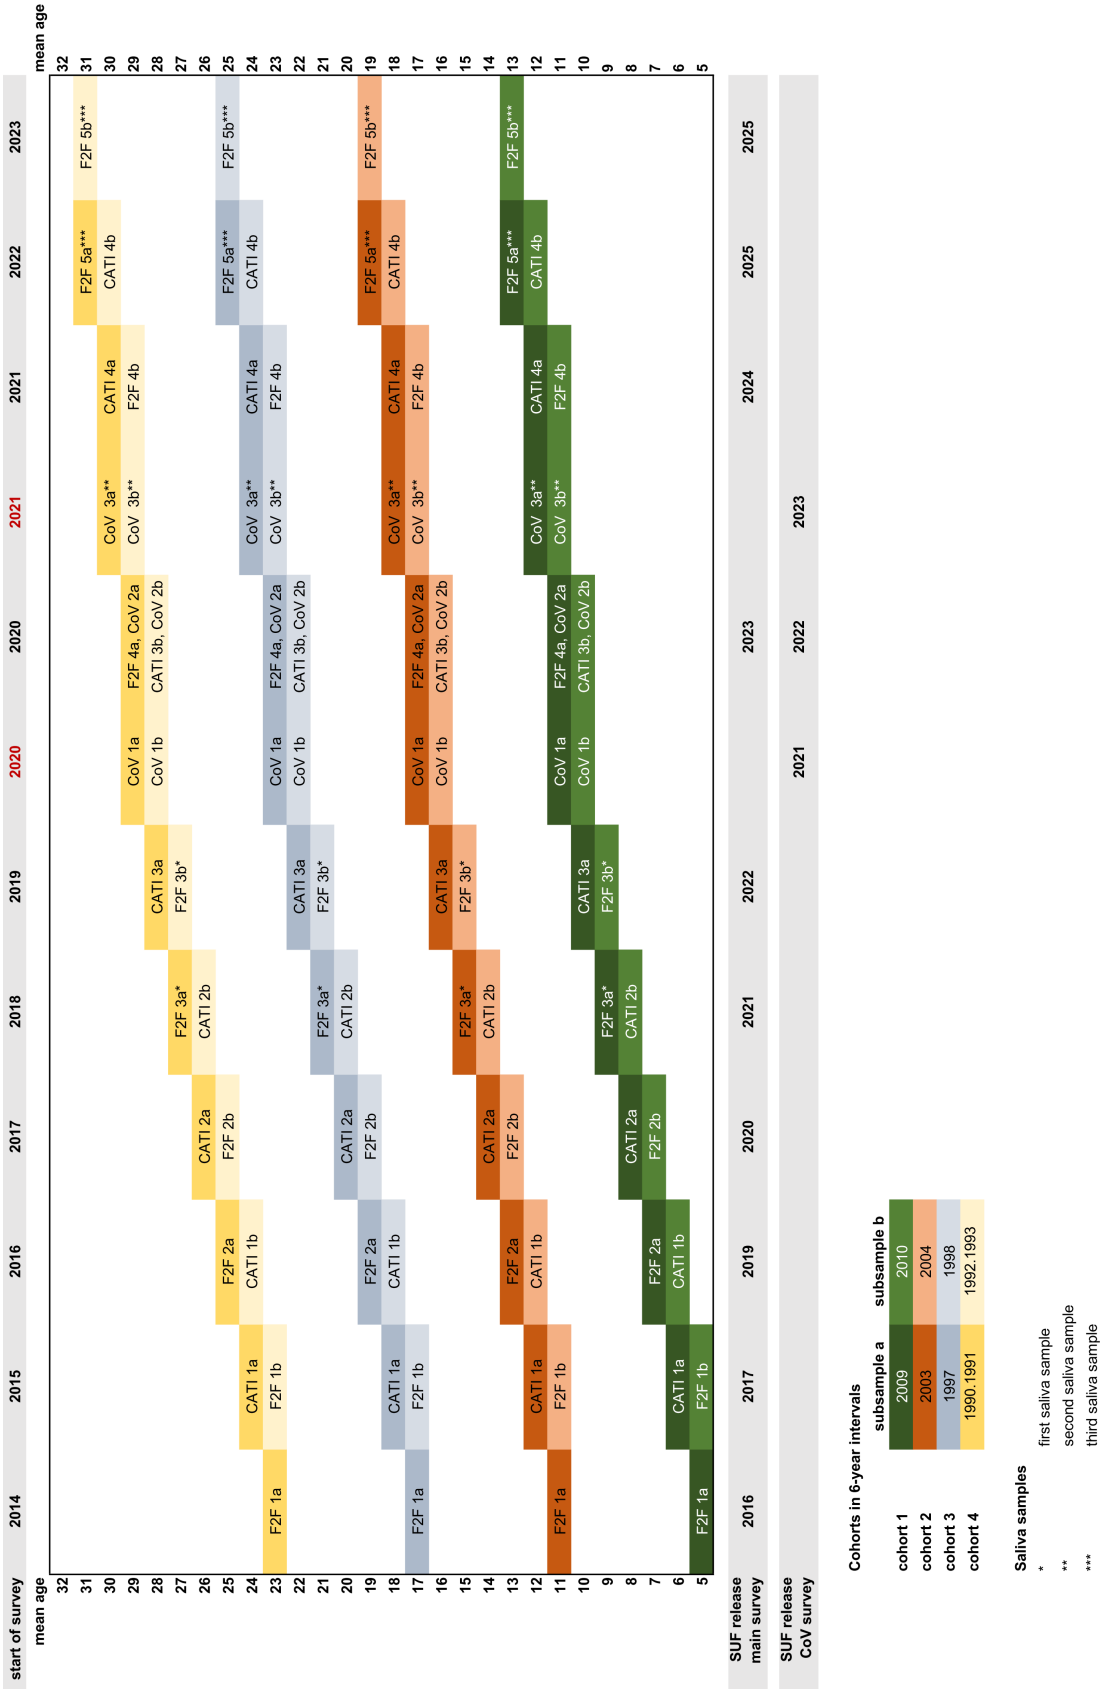

Figure 1: Overview of data collections in TwinLife

fid – family ID (scientific use file)

-85	-85: unknown	0
-86	-86: not available/empty/not codable	0
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	0
-92	-92: no participation in survey module	0
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	0
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	0

Waves: F2F 1; CATI 1; F2F 2; CATI 2; F2F 3; CATI 3; F2F 4; CATI 4; F2F 5; CoV 1; CoV 2; CoV 3; CoV 4
Filter based on instrument: always asked/always generated

hid_7 – household ID wave-specific (scientific use file) (F2F 4)

-85	-85: unknown	0
-86	-86: not available/empty/not codable	0
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	0
-92	-92: no participation in survey module	0
-93	-93: unclear classification of system missing	0

Question text:
Filter based on instrument: always asked/always generated
Generated variable
age0100 gives the age in years to the nearest month at the time of the family questionnaire. This means that the actual date of birth was set to the first day of the month and then the age was calculated. For reasons of data protection, the age in years to the day on the date of the family questionnaire (without change of the day of birth, as in **age0110**) cannot be released in the scientific use file. However, **age0110** is used to filter the questions. In most cases, **age0100** and **age0110** are identical. All age variables are based on the respondent's date of birth. This specification can be corrected by the respondent in each wave and is plausibilized longitudinally for further data processing. In the case of inconsistencies in an individual's date of birth, the most frequently given date of birth is used. If two dates of birth are equally frequent, the most recent is taken. Note that **age0100** in Cov3 is the age at the time of the individual questionnaire, as no family questionnaire is available in the Corona supplement.

Waves: F2F 1; CATI 1; F2F 2; CATI 2; F2F 3; CATI 3; F2F 4; CATI 4; F2F 5; CoV 1; CoV 2; CoV 3; CoV 4
Question text:
Filter based on instrument: always asked/always generated
Generated variable

age0200 specifies the age in years at January 1st of the (main) survey year of the subsample. The survey year is defined uniformly for the entire subsample in each wave, although in reality it may differ across families (see variable **yea_fq**). The defined survey years are: F2F 1 subsample a: 2015; F2F 1 subsample b: 2016; CATI 1a: 2016; CATI 1b: 2017; F2F 2a: 2017; F2F 2b: 2018; CATI 2a: 2018; CATI 2b: 2019. All age variables are based on the date of birth provided by the respondent. The specification can be corrected by the respondent in each wave and is plausibilized longitudinally for further data processing. In cases of inconsistent birth date information of an individual, the the most frequently cited date of birth is adopted. If two dates of birth were mentioned equally often, the latest specification is adopted.

age0201 – age in months on 01 January of survey year of subsample (gen)

Question text:
Filter based on instrument: always asked/always generated
Generated variable
In order to meet data protection requirements, regional information about a person, household, or family can only be provided in aggregated form. Therefore, an east-west indicator (**ewi**) was generated by dividing the German states (Bundeslaender) into two groups depending on their former affiliation to Western Germany (Federal Republic of Germany) or Eastern Germany (German Democratic Republic). Baden-Wuerttemberg, Bavaria, Bremen, Hamburg, Hesse, Lower Saxony, North Rhine-Westphalia, Rhineland-Palatinate, Saarland and Schleswig-Holstein belong to former Western Germany; Berlin, Brandenburg, Mecklenburg-West Pomerania, Saxony, Saxony-Anhalt and Thuringia belong to former Eastern Germany. According to the Federal Statistical Office of Germany, Berlin as a whole is count as part of former Eastern Germany. **ewi** is available on the household level. Please note that regional variables are generated from contextual information based on a household's contact address. In case of inconsistencies within a household ID, the regional information of the twins was prioritized over the information of the other household members. However, these inconsistencies occurred only in very rare cases.

gkpol_r – community size classification (political), 4 groups (gen)

1	1: 1 to 19,999 inhabitants	2057
2	2: 20,000 to 99,999 inhabitants	2691
3	3: 100,000 to 499,999 inhabitants	2364
4	4: 500,000 or more inhabitants	3475

Generated variable
In each face-to-face survey, there is an option to correct the gender of family members. In general, the last reported gender is included in the dataset. In the F2F4 questionnaire, the gender category 'divers' (third gender) has been introduced. However, as gender is a quasi-identifying attribute, the third category is not provided in the SUF for data protection reasons, as this category has rarely been selected so far. Changes in the gender identity of twins are also not reported in the SUF for data protection reasons.

7 Family structure and household characteristics

This chapter contains information on: characteristics of family members (name, age, gender of twins; name, age, gender and relation to twins of siblings and parents who don't live in household; partners of twins); family members living in the household; housing characteristics; number of households in the family; number of persons belonging to the household.

Generated variable
The housing conditions were surveyed on the household level and the corresponding questions (**liv0200** and **liv0300/liv0310** resp.: 'Are you the main tenant, subletter, or owner?') were answered by the person that has filled the household questionnaire. The variable **liv0210** was generated by processing the available information into the twin perspective and on a personal level. Please note that from CATI 1 (**wid** == 2) onwards, the question 'Have you been living here since about a year ago?' (**liv0600**) was asked in advance. Only persons who answered

'No' to this question were asked about their living conditions in **liv0200** and **liv0310**. In the other cases, the previous year's information was inserted. The household type (**liv0400**: 'In what type of household do you live?') was also surveyed in a personal perspective (dependent on the person type that filled the household questionnaire). The question was asked regardless of whether or not a person had indicated that they had already lived in the apartment in the past year (**liv0600**). The information was processed into the generated variable **liv0410** that provides the information in a general and (between person types) comparable perspective.

Filter based on instrument: always asked/always generated
Generated variable
mig0520, which is part of the master file of the Scientific Use File, includes all available information on the personal level and displays whether the individual has the German citizenship or not (*1: yes* or *2: no*). In the first face-to-face data collection (F2F 1) the citizenship was surveyed in a multicoding format as a self-report and a proxy-report of parents about their children, offering the respondent to mention one or several citizenships and give open answers (**mig0500(t/u/s)** - **mig0519(t/u/s)**). In the second face-to-face data collection (F2F 2), it was explicitly asked for the first citizenship as well as for the second citizenship, if applicable (including the offering of an open answer). The corresponding variables are **mig0550(t/u/s)** - **mig0553(t/u/s)**). The citizenship was surveyed of all respondents in both F2F 1 and F2F 2. It is stored, like the other migration variables, as constant variable in the master. In cases were the information given in F2F 2 differed from the one given in F2F 1, the latest information was used for the generation of **mig0520**.

Question text:
Filter based on instrument: always asked/always generated
Generated variable
mig0620 indicates the year in which German citizenship was granted. *mig0620* was generated on the basis of *mig0600* (self-reports) and *mig0600[t,u,s]* (parents' proxy statements) from F2F1 and, in the case of newly interviewed siblings, on the basis of *mig0600s* from F2F2. In *mig0620*, missing or even valid values for year of citizenship from F2F1 were replaced by valid information on year of citizenship from F2F2. This is only the case for a small number of siblings. Missing information on *mig0620* when German citizenship is available can be explained by the fact that certain persons did not receive the question, i.e. Alteri in F2F1, persons who were asked about their citizenship for the first time in F2F2 or later, or person who were asked about their citizenships in F2F2 again.

Question text:
Filter based on instrument: always asked/always generated

Generated variable
The country of birth was surveyed in the first face-to-face data collection (F2F 1) as a self-report (respondents aged 16 or above, **mig0100**, **mig0101**), proxy-report of parents about their children aged below 16 (twins and sibling, **mig0100t/u/s**, **mig0101t/u/s**) as well as a proxy-report about the own parents (**mig0300**, **mig0301**, **mig0400**, **mig0401**; persons aged 16 or above). In F2F 2 only first-time respondents were asked for their country of birth. In F2F 3, the country of birth was not surveyed. The information was collected by providing a list as well as the opportunity to give an open answer. For data privacy reasons the answers were recoded into country groups and stored in generated variables, where the self-reports and the proxy-reports of parents about their children were integrated into **mig2000**. Please note that proxy information by the twins or the sibling about the country of birth of their parents is *not* used for the generation of **mig2000** (e.g. **mig0300** for the generation of **mig2000** of the twin's mother, etc.). The treatment of missing values is addressed in **mig3000**. It can be derived from the table *mig2000_countrygroups.pdf* (URL Link) in the downloads section (URL Link) of the TwinLife documentation website which countries were included in which group. Please also note that different statements of twins about their country of birth are not harmonized. In about 20 cases/twin pairs the given information differs between the twins. The treatment of contradicting information is addressed in **mig3000**. **mig2000** is stored in the master data set.

Generated variable
The information whether a person was born in the German Democratic Republic (GDR) is stored in the variables **mig2001** (self-report), **mig2101** (respondent's report about mother) and **mig2201** (respondent's report about father). It is generated on the basis of the country of birth and considers whether the person was born during the existence of the GDR between 7/10/1949 and 2/10/1990. **mig0100** contains the answer on the question 'What country you were born in?'; *2* is the answer 'Germany, former GDR'. **mig0101** contains the open answers to the question. **gebdatg** is the individual birth date as the number of days since 01/01/1960; *-3738* corresponds to the date 07/10/1949 and *11232* to the date 02/10/1990.

```
replace mig2001 = 1 if (mig0100 == 2 | mig0101 == 'Ostdeutschland' | mig0101 == 'DDR')
replace mig2001 = 0 if (mig0100 == 2 | mig0101 == 'Ostdeutschland' | mig0101 == 'DDR')
```

The variable is stored in the master data set.

Question text:
Filter based on instrument: always asked/always generated
Generated variable
The country of birth was surveyed in the first face-to-face data collection (F2F 1) as a self-report (respondents aged 16 or above, **mig0100**, **mig0101**), proxy-report of parents about their children aged below 16 (twins and sibling, **mig0100t/u/s**, **mig0101t/u/s**) as well as a proxy-report about the own parents (**mig0300**, **mig0301**, **mig0400**, **mig0401**; persons aged 16 or above). In F2F 2 only first-time respondents were asked for their country of birth. In F2F 3, the country of birth was not surveyed. The information was collected by providing a list as well as the opportunity to give an open answer. For data privacy reasons the answers were recoded into country groups and stored in generated variables, where the proxy-reports of the twins and the sibling about their parents were integrated into **mig2100** and **mig2200**. Please note that self-reports of the parents about the country of their birth are *not* used for the generation of **mig2100** and **mig2200** (e.g. **mig0100** of the twins' mother for the generation of **mig2100**, etc.). For an extension of the generation, see **mig3100** and **mig3200**. It can

be derived from the table *mig2000_countrygroups.pdf* (URL Link) in the downloads section (URL Link) of the TwinLife documentation website which countries were included in which group. Please also note that different statements of twins and the sibling about the country of birth of their parents are not harmonized. In about 30 cases the given information differs between the siblings. The treatment of contradicting information is addressed in **mig3100** and **mig3200**. **mig2100** is stored in the master data set.

Question text:
Filter based on instrument: always asked/always generated
Generated variable
The variable **mig3000** is an extended and harmonized version of **mig2000** and combines all available information on respondents' country of birth. For those cases where the parents' self-report is not available, the information provided by the twins or the sibling about their biological parents' countries of birth is used (e.g. **mig2100** for the generation of **mig3000** of the twin's mother, etc.). If the twins' and the sibling's statements about their parents' countries of birth differ, the statement that is shared by two out of the three is designated as the parent's country of birth. Missing information of one of the twins is filled in with the information of the other twin. If the information about the twins' country of birth is contradicting, Germany is designated as the country of birth if at least one twin indicated to be born in Germany. The value -81 (contradictory information) is assigned for cases with no unambiguous information about the twins' country of birth.
mig3000 is stored in the master data set.

Generated variable
The variable **mig4000** is based on **mig3000**, **mig3100**, and **mig3200** and contains information on the twins and the sibling's migration background up to the third generation. The variable indicates whether the twins' or the sibling were born in Germany (0); born abroad (1); have no personal migration but migration of at least one parent (2); no personal nor migration of either parent but migration of at least one grandparent (3). The migration background was constructed for twins with at least one (grand-)parental information available. In cases where the information on the country of birth is contradicting but it is known that the respondent is born abroad, the information about the foreign birth is used without considering

the particular country. Twins and siblings with missing information on both parents or all grandparents were assigned the value -86 (not available/empty/not codable). Please note, **mig4000** only considers information about biological parents. The variable is stored in the master data set.

Generated variable
The variable *zyg0102* combines the information from the results of the zygosity questionnaire in F2F1 (zyg0100) and the DNA samples from F2F1 (zyg0101). It is recommended to use the new variable *zyg0112* as this is updated by the results of the DNA analysis of F2F3. For details regarding the generated zygosity variables, see the Technical Report No. 1 (URL Link).

Question text:
Filter based on instrument: always asked/always generated
Generated variable
The variable *zyg0112* combines the information from the results of the zygosity questionnaire in F2F1 (zyg0100) and the DNA samples from F2F1 (zyg0101) and F2F3 (zyg0111). It

is recommended to use this updated variable instead of *zyg0102* which does not yet contain the results of the DNA analysis from F2F3. For details regarding the generated zygosity variables, see the Technical Report No. 1 (URL Link).

11 Educational attainment and success

This chapter contains information on: ; desired school-leaving qualification; expected probability to attain a degree; extracurricular programmes (e.g., assistance with homework); history of education and graduation: educational degrees, vocational training, year abroad; photos of school reports, self-report on school grades (current school marks, marks of highest graduation); pressure and stress at school; recommendation for secondary education; type of education / training; current status of education / qualification.

cer0001 – participation in the report card module (gen)

1	1: report card photo is available	0
2	2: alternative questionnaire is available	2895
3	3: report card photo and alternative questionnaire are available	0

Waves: F2F 1; F2F 2; F2F 3; F2F 4; F2F 5
Question text:
Filter based on instrument: always asked/always generated
Generated variable
cer0001 was generated from the information provided in the report card module. Those respondents who did not consent to have a photo taken of their report card received the alternative questionnaire on the most recent or final report card. Those for whom there was consent for the report card photograph (cer1002==1), but for whom both the report card photograph and the alternative questionnaire were missing, received the code -94 (technical error).

Question text:
Filter based on instrument: always asked/always generated
Generated variable
cer1002 was generated from the variables cer1001 and cer1001[t,u,s] at the person level (ptyp=1,2,200) and indicates whether there was consent to photograph the report card. The missing code -94 in the variables of the report card photo module means that there is no photo due to a technical error, although the consent to take the photo was given (cer1002==1). It could be technical problems with taking the photo or it was forgotten to take the photo.
Item developed for TwinLife.

The response option 'orientation school' (German: 'Orientierungsschule') was incorrectly given in the questionnaire until data collection F2F2, although this type of school no longer exists in Germany. Therefore, this category was deleted from CATI2 onwards. In CATI3, edu0400 also contains the proxy information of the parents of the variables edu0400t and edu0400u.

Generated variable

The International Standard Classification of Education (ISCED) is a classification of educational attainment and level of education. The ISCED classification takes into account the country-specific complexity of educational programs in terms of the type and duration of school or training. It ranges from 0 (pre-primary level of education) to 6 (second stage of tertiary education, leading to an advanced research qualification).
The qualifications of the German education system can be assigned to the following ISCED-97 levels (cf. Schneider 2008):

- Level 0: Pre-primary education, such as Kindergarten
- Level 1: Primary school
- Level 2B: Elementary and lower secondary school and apprenticeship training
- Level 2A: Realschule, Mittlere Reife and Polytechnische Oberschule (GDR)
- Level 3B: Vocational training in the dual system, intermediate administrative training, vocational/college school-leaving certificate and one-year schools of health services
- Level 3A: Advanced technical college entrance qualification and Abitur (A-levels)
- Level 4B: Combination of two vocational degrees in ISCED 3B
- Level 4A: Qualification in both levels 3A and 3B
- Level 5B: Master craftsman/technician, 2 to 3 year school of health services, technical/vocational academy, technical school diploma (GDR) and technical school of administration
- Level 5A: Fachhochschule degree, university degree
- Level 6: Doctorate, PhD

The variable **eca0108** is constructed from the two generated variables for the highest school leaving certificate (**eca0130**) and the highest vocational qualification (**eca0230**). The ISCED variable generated for TwinLife does not include level 2B, as information on pre-vocational programs is not available. In F2F2 (in contrast to F2F 1), additionally to the highest vocational qualification, information on a further professional qualification (**eca0221**) was collected. This also allows ISCED level 4B (combination of two vocational qualifications in level 3B) to be coded in F2F 2. However, a retroactive adjustment for F2F 1 could not be made, as the year of completion of the further education was not available. There is also no information on the length of training at health schools. In these cases, a minimum of two years was assumed when classifying according to ISCED levels.
Please note that **eca0108** cannot be used as an ordinal scale because ISCED levels are divided into subcategories (e.g. levels 5A and 5B, where level 5A is a more advanced qualification than level 5B).
For more information on the ISCED classification, see OECD (1999), and Schneider (2008).
OECD (Ed.). (1999). Classifying educational programmes: Manual for ISCED-97 implementation in OECD countries. Organisation for Economic Co-operation and Development. [URL link]; Schneider, S. L. (2008). Applying the ISCED-97 to the German educational qualifications. In (Ed.) Schneider, The International Standard Classification of Education (pp. 76-102). MZES, University of Mannheim. CASMIN (Comparative Analysis of Social Mobility in Industrial Nations) is a hierarchically structured educational scale that is classified on the basis of general school education and vocational qualifications. The CASMIN variable **eca0109** implemented for TwinLife is based on the highest school leaving certificate (**eca0130**) and the highest vocational qualification (**eca0230**).
For more information on the CASMIN classification, see Brauns et al. (2003), and Brauns & Steinmann (1999).
Brauns, Hildegard, Scherer, S., & Steinmann, S. (2003). The CASMIN Educational Classification in International Comparative Research. In J. H. P. Hoffmeyer-Zlotnik & C. Question text:
Filter based on instrument: always asked/always generated
Generated variable
Information on the highest school-leaving certificate was collected at the time of the first data collection (F2F1 or the first data collection a person participated in). In subsequent data collections, newly acquired school-leaving qualifications were collected and the previously recorded school-leaving qualification were replaced if the newly acquired qualification was a higher school degree. If graduation information from the school module (**eca**) is not available for respondents, missing graduation information from the report card module (**cer**) is integrated. Please note: For those participants who stated in the second face-to-face data collection (F2F 2) that they had obtained a new school leaving certificate, the information on the highest school leaving certificate was collected again. For some respondents who were wrongly identified as first-surveyed respondents, there are also duplicate entries in F2F1 and F2F2. If a higher school leaving certificate was reported in F2F 2 and the certificate was obtained before the interview of the first data collection, the highest school qualification was corrected retroactively. Open statements were recoded into categories 1 to 5. Special school qualifications (Foerderschule) were equated with the 'Hauptschulabschluss'. Open entries that could not be assigned to these categories were recoded into -89 (not codable). If respondents do not have graduation information from the school module, missing graduation information from the report card module is integrated.

eca0200 – type of vocational training or university degree/diploma/qualification(>= 15 yr)

The International Standard Classification of Occupations from 2008 (ISCO-08) classifies occupations (internationally comparably) considering the required skill level (degree of complexity, based on the educational qualification) of an occupation as well as the skill specialization (the type of skills that are needed especially for this occupation). TwinLife delivers the ISCO classification on the sub-major group level (two digits) for the occupational activity (**emp0503** and **emp0513**), the field of study of the highest vocational qualification (**eca0205**) and as well as the occupational activities of the twins' grandparents (**bpa0208**, **bpa0308**, **bpa0508**, **bpa0608**). For more information about the ISCO classification visit the ILO website (URL Link). The open-ended responses on occupation were coded into ISCO-08 by the survey institute (TNS Infratest/Kantar for F2F 1, infas for F2F 2). Infratest performs the coding on the basis of an electronically available directory developed by Statistik Austria (see TNS Infratest/Kantar ISCO-08 documentation (URL Link) on the TwinLife documentation website (URL Link)). Infas bases the ISCO coding on specifications developed by GESIS. The exact procedure of occupation coding was described in detail by Geis and Hoffmeyer-Zlotnik (2000) using ISCO-88 as an example. In addition, extensive guidance on the practical implementation of occupational coding can be found in Geis (2011). Building on this knowledge of ISCO-88, there is the ISCO-08 code scheme, explanations and notes on the differences between ISCO-08 and ISCO-88. These have been coordinated by infas with GESIS. Specifications that could not translated into the schemes (such as 'team leader', 'specialist', or 'intern') were coded into -81 (no occupation or occupational activity mentioned) or -89 (not codable).

ISEI (International Socio-Economic Index of Occupational Status) is a measure of a person's socio-economic status and takes into account the individual's occupation, income and education. ISEI-08 categories range from 12 to 90. The ISEI is generated for

- the occupation of the current employment (**emp0505**),
- the apprenticeship or field of study of the highest professional qualification (**eca0207**),
- the apprenticeship or field of study acquired since the last interview (**eca1207**),
- the apprenticeship or field of study of the vocational qualifications mentioned in F2F3 and F2F4, which were surveyed in a follow-up in F2F5 (**eca1217**, **eca1227**).

The ISEI variables have been coded on the basis of the four-digit version of the ISCO-08 classification. It was created using the Stata program *iscogen.ado* (Jann, B. (2019)), which is based on the SPSS script *isqoisei08.sps* by Harry Ganzeboom. For more information see Ganzeboom & Treiman (1996) and Ganzeboom (2010).

Generated variable
SIOPS (Standard Index of Occupational Prestige Scale) is a classification for a prestige ranking of occupations (from 0 to 100). The SIOPS is generated for

- the occupation of current employment (**emp0508**),
- the apprenticeship or field of study of the highest professional qualification (**eca0208**),
- the apprenticeship or field of study acquired since the last interview (**eca1208**),
- the apprenticeship or field of study of the vocational qualifications mentioned in F2F3 and F2F4, which were surveyed in a follow-up in F2F5 (**eca1218**, **eca1228**).

The SIOPS variables have been coded on the basis of the four-digit version of the ISCO-08 classification. It was created using the Stata program *iscogen.ado* (Jann, B. (2019)). For more information see Ganzeboom & Treiman (1996).

Filter based on instrument: always asked/always generated
Generated variable

Information on the highest professional qualification was collected at the time of the first data collection (F2F1 or the first data collection a person participated in). In subsequent data collections, newly acquired professional degrees were collected and the previously recorded professional qualification was replaced if the newly acquired qualification was a higher professional degree. The second face-to-face data collection (F2F 2) again asked for the highest professional qualification as well as any further professional degree. If a higher professional certificate was reported in the second face-to-face data collection and the certificate was obtained before the interview of the first data collection, the highest professional qualification was corrected retroactively. The same applies to the family members who indicated in the first wave that they had obtained a degree from a 'Berufsakademie or Fachhochschule' (university of applied sciences, university of cooperative education). While these degrees were recorded jointly into one category in the first data collection (category 8), separate categories were introduced in the subsequent data collection (categories 6 and 7). A retroactive correction is thus made for those family members for whom both F2F1 and F2F2 contain information on the highest degree. The respondents' information on a second professional qualification (only available from F2F2) was also taken into account if this could be recognized as a higher qualification. Open statements were recoded into categories 1 to 10. Open entries that could not be assigned to these categories were recoded into -89 (not codable). Plausibility checks by age and corresponding adjustments were not made.

Waves: F2F 1; CATI 1; F2F 2; CATI 2; F2F 3; CATI 3; F2F 4; CATI 4; F2F 5
Generated variable
The response option 'orientation school' (German: 'Orientierungsschule') was incorrectly given in the questionnaire until data collection F2F2, although this type of school no longer exists in Germany. Therefore, this category was deleted from CATI2 onwards. In CATI3, edu0400 also contains the proxy information of the parents of the variables edu0400t and edu0400u.

Question text: `CFT 20-R result` [item text: `CFT 20-R T1 total: sumscore`]
Filter based on instrument: always asked/always generated
The intelligence test was administered in F2F1, F2F2, and F2F4. The intelligence test was implemented in F2F1 for all participating children aged 9 years or younger (CFT-1, paper-and-pencil) and for respondents aged 10 years or older (CFT-20, CASI). New respondents in F2F2 were also given the opportunity to take the intelligence test. The intelligence test was again administered in the F2F4 data collection using the Hogrefe online test system, but only for twins and siblings. A detailed description of the test batteries, test routines and further recommendations for the use of cognitive data can be found in Klatzka & Lenau (2024) (URL Link). Please note that in rare cases, participants in F2F 2 were mistakenly treated as new to

the sample and therefore took the test a second time. In these cases there are two test results (in F2F 1 and F2F 2).

Question text:
Filter based on instrument: always asked/always generated
Generated variable
The 15-digit variable reflects respondents' actual responses on the 15-items subtest (raw data), allowing data users to check respondents' response patterns. It is only provided for the harmonized version (total test time). The numbers 1 to 5 reflect the test response, the number 9 indicates a missing value (the item was not answered). A detailed description of the test batteries, test routines and further recommendations for the use of cognitive data can be found in Klatzka & Lenau (2024) (URL Link).

Question text:
Filter based on instrument: always asked/always generated
Generated variable
The 15-digit variable reflects respondents' actual responses on the 15-items subtest (raw data), allowing data users to check respondents' response patterns. It is only provided for the harmonized version (total test time). The numbers 1 to 5 reflect the test response, the number 9 indicates a missing value (the item was not answered). A detailed description of the test batteries, test routines and further recommendations for the use of cognitive data can be found in Klatzka & Lenau (2024) (URL Link).

Question text:
Filter based on instrument: always asked/always generated
Generated variable
The 15-digit variable reflects respondents' actual responses on the 15-items subtest (raw data), allowing data users to check respondents' response patterns. It is only provided for the harmonized version (total test time). The numbers 1 to 5 reflect the test response, the number 9 indicates a missing value (the item was not answered). A detailed description of the test batteries, test routines and further recommendations for the use of cognitive data can be found in Klatzka & Lenau (2024) (URL Link).

13 Employment status of household members

This chapter contains information on: educational and employment status of all household members (employment / education / vocational training / parental leave / pension).

hpr0101 – employment status - kindergarten/child care institution

0	0: not mentioned	10348
1	1: mentioned	194

Generated variable
When interpreting and analyzing the variable **emp0400**, it is important to note that changes in the specification of response categories were made starting from F2F 2. Specifically, in F2F 2, the categories Full-time employed and Part-time employment were specified with weekly hours to enable a more accurate recording of working hours. The category Marginally employed also includes a weekly hours limit since F2F 2. The category for voluntary services has been simplified to unify various types of voluntary services under one term. The category for non-employment was slightly rephrased to ensure broader coverage. In F2F 5, the category for training was expanded to include dual study programs.
Categories in F2F1:

```
1. Full employed
2. Part-time employment
3. In-company training/apprenticeship or in-company retraining
4. Marginally employed; Mini Job; One-euro job, e.g., when receiving unemployment benefit
5. Occasionally or irregularly employed
6. Voluntary military service
7. Voluntary social/ecological year, federal voluntary service
8. In phased retirement with zero working hours
9. Early retirees, pensioners, unable to work
10. Not employed
11. Other, namely:
```

Categories from F2F2:

```
1. Full-time employed (at least 35 weekly hours)
2. Part-time employment (also with parallel part-time jobs) (at least 16 and less than 35
3. In-company training/apprenticeship or in-company retraining
3. In-company training/apprenticeship (also dual study programs) or in-company retraining
4. Marginally employed, Mini Job, One-euro job (when receiving unemployment benefit 2) (
5. Occasionally or irregularly employed
6. Voluntary military service
7. Voluntary year, e.g., social or ecological year, federal voluntary service
8. In phased retirement with zero working hours
9. Early retirees, pensioners, unable to work
10. Other non-employment
11. Other, namely:
```

The International Standard Classification of Occupations of 2008 (ISCO-08) classifies occupations (internationally comparable) according to the required skill level (degree of complexity, based on educational qualifications) of an occupation as well as the skill specialization (the type of skills required specifically for this occupation). TwinLife provides the ISCO classification at the level of sub-subgroups (two digits) for

- the occupation of the current employment (**emp0503** and **emp0513**),

- the occupation of the previous employment (**emp0553**, CATI1 only),
- the apprenticeship or field of study of the highest professional qualification (**eca0205**),
- the apprenticeship or field of study acquired since the last interview(**eca1205**),
- the apprenticeship or field of study of the vocational qualifications mentioned in F2F3 and F2F4, which were surveyed in a follow-up in F2F5 (**eca1215**, **eca1225**), and
- the occupational activities of the grandparents of the twins (**bpa0208**, **bpa0308**, **bpa0508**, **bpa0608**).

For more information about the ISCO classification visit the ILO website (URL Link). The open-ended responses on occupation were coded into ISCO-08 by the survey institute (TNS Infratest/Kantar for F2F 1, infas for Fall other waves). Infratest performs the coding on the basis of an electronically available directory developed by Statistik Austria (see TNS Infratest/Kantar ISCO-08 documentation (URL Link) on the TwinLife documentation website (URL Link)). Infas bases the ISCO coding on specifications developed by GESIS. The exact procedure of occupation coding was described in detail by Geis and Hoffmeyer-Zlotnik (2000) using ISCO-88 as an example. In addition, extensive guidance on the practical implementation of occupational coding can be found in Geis (2011). Building on this knowledge of ISCO-88, there is the ISCO-08 code scheme, explanations and notes on the differences between ISCO-08 and ISCO-88. These have been coordinated by infas with GESIS. Specifications that could not translated into the schemes (such as 'team leader', 'specialist', or 'intern') were coded into -81 (no occupation or occupational activity mentioned) or -89 (not codable).

Generated variable
ISEI (International Socio-Economic Index of Occupational Status) is a measure of a person's socio-economic status and takes into account the individual's occupation, income and education. ISEI-08 categories range from 12 to 90. The ISEI is generated for

- the occupation of the current employment (**emp0505**),
- the apprenticeship or field of study of the highest professional qualification (**eca0207**),
- the apprenticeship or field of study acquired since the last interview (**eca1207**),
- the apprenticeship or field of study of the vocational qualifications mentioned in F2F3 and F2F4, which were surveyed in a follow-up in F2F5 (**eca1217**, **eca1227**).

The ISEI variables have been coded on the basis of the four-digit version of the ISCO-08 classification. It was created using the Stata program *iscogen.ado* (Jann, B. (2019)), which is based on the SPSS script *isqoisei08.sps* by Harry Ganzeboom. For more information see Ganzeboom & Treiman (1996) and Ganzeboom (2010).

Question text:
Filter based on instrument: always asked/always generated
Generated variable
SIOPS (Standard Index of Occupational Prestige Scale) is a classification for a prestige ranking of occupations (from 0 to 100). The SIOPS is generated for

- the occupation of current employment (**emp0508**),
- the apprenticeship or field of study of the highest professional qualification (**eca0208**),
- the apprenticeship or field of study acquired since the last interview (**eca1208**),
- the apprenticeship or field of study of the vocational qualifications mentioned in F2F3 and F2F4, which were surveyed in a follow-up in F2F5 (**eca1218**, **eca1228**).

The SIOPS variables have been coded on the basis of the four-digit version of the ISCO-08 classification. It was created using the Stata program *iscogen.ado* (Jann, B. (2019)). For more information see Ganzeboom & Treiman (1996).

Waves: F2F 1; F2F 2; F2F 3; F2F 4; F2F 5
Question text:
Filter based on instrument: always asked/always generated
Generated variable
The EGP-classes (Erikson-Goldthorpe-Portocarero classes) is a classification for the socioeconomic status of the parents, considering the type of occupational activity, the occupational status, managerial responsibility, and the kind of qualification needed for the occupational activity. For the generation of the EGP of the occupational activity (**emp0508**) the ISCO-08 variable **emp0503_iuf** (4 digits (unit group level), not part of the Scientific Use File) needed to be translated in the ISCO-88 classification first, using the Stata ado *iscogen.ado* that bases on a conversion tool by Harry Ganzeboom (URL Link).

```
iscogen emp0503_88 = isco88(emp0503_iuf), from(isco08)
```

Then, the EGP variable was generated, again using the Stata ado *iscogen.ado* (Jann, B. (2019)), also considering self-employment (**emp0602**) and supervisory status (**supviss**).

```
iscogen emp0508 = egp11(emp0503_88 emp0602 supviss), from(isco88)
```

The necessary information about the number of employees (**supviss**) only differentiates between whether the person supervises more than one and less than ten persons (**supviss** == 2), or more than ten persons (**supviss** == 11). It is based on information about the occupational status (from **emp0601** and **emp0605**) and the actual number of employees when being self-employed (**emp0603**):

```
gen supviss = .
replace supviss = 2 if emp0603 == 2   // self-employed with 1-9 employees
replace supviss = 11 if emp0603 == 3   // self-employed w. 10+ employees
replace supviss = 2 if emp0601 >= 4   // assumption: 1-9 subordinates
replace supviss = 2 if emp0605 == 6   // assumption: 1-9 subordinates
replace supviss = 11 if emp0605 == 7   // assumption: 10+ subordinates
replace supviss =. if wid == 2     // necessary inf. NA in CATI 1 (wid==2)
```

emp0508 was only generated for the F2F data collections. For more information, see Ganzeboom & Treiman (1996).

The ESeC (The European Socio-economic Classification) is a scheme provided for the whole adult population, but is mainly occupationally based classification. It was developed from the EGP (Erikson-Goldthorpe-Portocarero) scheme. The categories of the ESeC summarize occupations according to their position in the labor market and the type of labor regulation. The information required to create ESeC is: occupation coded to the minor groups (i.e. 3-digit groups) of the EU variant of the International Standard Classification of Occupations 1988 (ISCO88 (COM)); details of employment status, i.e. whether an employer, self-employed or employee; number of employees at the workplace; whether a worker is a supervisor. For the generation of the ESeC (**emp0515**) the ISCO-08 variable **emp0503_iuf**

(4 digits (unit group level), not part of the Scientific Use File) needed to be translated in the ISCO-88 classification first, and then in the ISCO-88-COM classification, using the Stata ado *iscogen.ado* (Jann (2019)) that bases on a conversion tool by Harry Ganzeboom (URL Link). Further, self-employment (**emp0602**) and supervisory status (**supviss**, for the generation of this variable, see **emp0508**, EGP) is considered.

```
iscogen emp0503_88 = isco88(emp0503_iuf), from(isco08)
iscogen emp0503_88com = isco88com(emp0503_88), from(isco88)
iscogen emp0515 = esec(emp0503_88com emp0602 supviss)
```

emp0515 was only generated for F2F 1 (wid 1) and F2F 2 (wid 3). For more information on the ESeC classification, see Harrison & Rose (2006).

Waves: F2F 1; F2F 2; F2F 3; F2F 4; F2F 5
Generated variable
Until 30 June 2019, an upper earnings limit of 850 euros applied to midijobs, from 1 July 2019 a limit of 1300 euros, from 1 October 2022 1600 euros, from 1 January 2023 2,000 euros. As of 1 October 2022, the upper earnings limit for mini-jobs was raised from 450 euros to 520 euros.
Please note that the questionnaire instrument for F2F3b and F2F4 still shows the old upper limits of 850 euros. However, the question correctly asks for minijob and midijob.

The WZ 2008 is the German classification of economic sectors and bases on the Statistical Classification of Economic Activities in the European Community (NACE). In **emp0709** the open answers of the respondents on the question about the sector in which they work (**emp0707**: 'In which sector of the economy/which branch/which service area is the company or the institution predominantly active? Please quote the exact name, e.g. not industry, but electrical industry; not trade, but retail; not public service, but hospital.') are classified into 88 departments. For more information about this classification, see the documentation on the classification server of the Federal Statistical Office of Germany (URL Link).

Question text:
Filter based on instrument: always asked/always generated
Generated variable
Twin families are a special type of family that could be de-anonymized more easily than other families when combining several characteristics known from the data, especially when these characteristics exceedingly diverge from the average, such as a very high or very low income. In order to ensure the anonymity of the twin families, very high and very low values of the personal income variable **inc0100** is manipulated in a way that the incomes cannot lead back to one individual, but the income distribution, as well as analyses, are not affected by the alterations. The manipulation follows the recommendations of Wirth (1992). Personal income was collected in variable **inc0100** in all data collections except CATI 2 and 3. First, only for CATI 1 a categorical variable (corresponding to **inc0103**) is generated from the variables **inc0102**, **inc0105**, **inc0106**. In the next step, for the cases in which no monthly personal income was reported, the annual income from **inc0101** (if available) is divided by 12 and integrated into **inc0100**. A single case correction was made in F2F 1, where monthly and annual income were obviously confused (**pid_suf** == 124589400). Other conspicuities are recorded and flagged in the variables **inc0120** and **inc0121**. Finally, following Wirth (1992), the five highest and lowest income specifications are replaced by their average (manipulation of the strongest outliers) and the 10% highest and lowest income statements are assigned a random error of +/- 1% of the initial value using a random variable. As a result, 80% of the incomes are not affected by the manipulation. The resulting manipulated variable **inc0110** is supplied in the SUF.
Please note: No structured plausibility analyses were conducted based on the income data. Accordingly, no adjustment to the income was made, except for the described manipulations in the interest of data protection. In rare cases it seems that annual rather than monthly income were inadvertently reported in **inc0400**.

Filter based on instrument: always asked/always generated
Generated variable
Twin families are a special type of family that could be de-anonymized more easily than other families when combining several characteristics known from the data, especially when these characteristics exceedingly diverge from the average, such as a very high or very low income. In order to ensure the anonymity of the twin families, very high and very low values of the household income variable **inc0400** are manipulated in a way that the incomes cannot lead back to one household or individual, but the income distribution, as well as analyses, are not affected by the alterations. The manipulation follows the recommendations of Wirth (1992). In order to process a maximum of income information, the first step is to integrate the specification of income categories from **inc0403** into the variable **inc0400**. Here, the middle of the specified category is used. In F2F 2, CATI 2 and F2F 3, the yearly household income (**inc0404**) was also recorded as an alternative - this information is also converted first (divided by 12) and then integrated into **inc0400**. In CATI 1, household income was recorded at the personal level. Therefore, it may happen that within one household several different household incomes are specified. Here, the median of all information provided in the household was used. Finally, following Wirth (1992), the five highest and lowest income specifications are replaced by their average (manipulation of the strongest outliers) and the 10% highest and lowest income statements are assigned a random error of +/- 1% of the initial value using a random variable. As a result, 80% of the incomes are not affected by the manipulation. The resulting manipulated variable **inc0401** is supplied in the SUF. Conspicuities are recorded and flagged in the variables **inc0420**, **inc0421**, **inc0423** and **inc0423**.
Please note: No structured plausibility analyses were conducted based on the income data. Accordingly, no adjustment to the income was made, except for the described manipulations in the interest of data protection.
Please note: Due to the reduced questionnaire in CATI 2 (wid=4), twins in cohorts 3 and 4 were not asked about their household income if they were still living with at least one parent. As a result, mean and median incomes are much lower than in previous data collections in these cohorts.
Please note: In rare cases it seems that annual rather than monthly income were inadvertently reported in **inc0400**.

Question text:
Filter based on instrument: always asked/always generated
Generated variable
Besides the (manipulated) household income, we generate and provide the net equivalent household income using the modified OECD scale (`http://www.oecd.org/els/soc/OECD-Note-Equivalenc pdf`). For this generated variable, the household size and composition are taken into account. The concept is based on the assumption that people (e.g., two adults) save money and are fictitiously 'richer' by living together in one household and sharing a common budget and the fixed costs instead of living in separate households. For more information about the concept, see OECD (2011). For this purpose, the household composition recorded in the household questionnaire is used to calculate how many adult persons (aged 14 and older) and how many children (under 14) live in the household. In CATI 2 and 3, the household composition was not recorded systematically by the interviewer, but was surveyed in the household questionnaire. This self-report of the respondent was used as the basis for calculating the equivalence income. According to OECD (2011), the 'household head' gets a weight of 1, each further adult person gets a weight of 0.5, and each child a weight of 0.3. The household income is then divided by the sum of all weights in the household. The resulting variable **inc0411**, the net equivalent household income, is published in the SUF.
Please note: Due to the reduced questionnaire in CATI 2 (wid=4), twins in cohorts 3 and 4 were not asked about their household income if they were still living with at least one parent.

Question text:
Filter based on instrument: always asked/always generated
Generated variable
This flag variable indicates whether a multiple of child allowances are specified in the generated monthly household income variable (**inc0401**). Imprecise question wording in F2F 1 may have led respondents to relate the question about monthly household income to the total of their government benefit payments (public services). This is only verifiable for child allowances, as this is the only fixed (and thus known to us) variable for government benefits. The number of cases in F2F 1 for which the flag applies suggests that an even larger proportion of households could have reported the sum of government benefits received, which should be kept in mind when analyzing the variable. Please note that only cases where the exact amount of a multiple of child benefit was stated have been flagged. In the SUF data, these cases are not uniquely identifiable, as the lower 10% of household income data have been manipulated (see the variable text for **inc0401**).

20 Subjective social status

This chapter contains information on: subjective social status.

sss0100 – subjective social status, ladder 10 rungs (>=16 yr)

1	1: at the bottom	14
2	2	39
3	3	174
4	4	366
5	5	964
6	6	1400
7	7	1817
8	8	1019
9	9	226
10	10: at the top	59
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	1870
-92	-92: no participation in survey module	1467
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	1155
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	20

Waves: F2F 4; F2F 5
Question text: `Please imagine a ladder with 10 rungs, intended to show where people in Germany stand. At the very top are those with the most money, the highest level of education, and the best jobs. At the very bottom are those with the least money, the lowest education, the worst jobs, or no job at all. The higher you are on the ladder, the closer you are to the people at the very top, and the lower you are, the closer you are to the people at the very bottom. Where would you place yourself on the ladder? Please indicate on which rung you believe you stand in your current stage of life in comparison to other people in Germany.`
Filter based on instrument: module 'discrimination, bullying' (CAWI): age0110>=16
Hoebel, J., Mueters, S., Kuntz, B., Lange, C., & Lampert, T. (2015). Messung des subjektiven sozialen Status in der Gesundheitsforschung mit einer deutschen Version der MacArthur Scale. Bundesgesundheitsblatt - Gesundheitsforschung - Gesundheitsschutz, 58(7), 749-757. [URL link]

21 Subjective physical health

This chapter contains information on: current subjective health.

she0100 – last 12 months: state of health (>= 10 yr)

1	1: excellent	609
2	2: very good	2186
3	3: good	3184

4	4: less good	981
5	5: poor	167
6	6: very poor	31
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	1870
-92	-92: no participation in survey module	1467
-93	-93: unclear classification of system missing	0

22 Objective physical health / Diagnoses

This chapter contains information on: diagnoses (adults and children); heigth, weight, bmi; impairment caused by diseases.

bdy0100 – height in cm (>= 10 yr)

-85	-85: unknown	0
-86	-86: not available/empty/not codable	0
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	1870
-92	-92: no participation in survey module	1467
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	1070
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	14

Waves: F2F 1; F2F 2; F2F 4; F2F 5
Generated variable
For more information about the height, weight and BMI measures and its peculiarities, see the Technical Report No. 6, v3-0-0 (URL Link).
Item developed for TwinLife.

bdy0100t – height in cm twin 1 (m/f/n/g)

-85	-85: unknown	0
-86	-86: not available/empty/not codable	0
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	1870
-92	-92: no participation in survey module	1467
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	2
-95	-95: doesn't apply (screened out)	6735
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	1

Waves: F2F 1; F2F 2; F2F 3; F2F 4; F2F 5
Generated variable
For more information about the height, weight and BMI measures and its peculiarities, see the Technical Report No. 6, v3-0-0 (URL Link).
Item developed for TwinLife.

bdy0100u – height in cm twin 2 (m/f/n/g)

-85	-85: unknown	0
-86	-86: not available/empty/not codable	0
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	1870
-92	-92: no participation in survey module	1467
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	2
-95	-95: doesn't apply (screened out)	6735
-98	-98: don't know	0

-99	-99: not specified (refused to answer)	1

Waves: F2F 1; F2F 2; F2F 3; F2F 4; F2F 5
Generated variable
For more information about the height, weight and BMI measures and its peculiarities, see the Technical Report No. 6, v3-0-0 (URL Link).
Item developed for TwinLife.

bdy0100s – height in cm sibling (m/f/n/g)

-85	-85: unknown	0
-86	-86: not available/empty/not codable	0
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	1870
-92	-92: no participation in survey module	1467
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	7062
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	0

Waves: F2F 1; F2F 2; F2F 3; F2F 4; F2F 5
Question text: `How tall is [name of child]? If you do not know exactly, you are welcome to measure your child now, otherwise please estimate.`
Filter based on instrument: module 'parents on child' (CAWI): (euek==1) & (inrange(age0110s,5,13))
Item developed for TwinLife.

bdy0100_dht – difference between several height values (gen)

-80	-80: substantial multi-value difference	0
-81	-81: implausible	0
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	1621
-92	-92: no participation in survey module	985
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	2
-95	-95: doesn't apply (screened out)	7966

28 Deviant and delinquent Behavior

This chapter contains information on: long/short version of deviant-delinquent behaviour measure.

del0100 – delinquency ever: fare dodging (t,u,s, >= 10 & <= 18 yr)

1	1: yes	152
2	2: no	725
-84	-84: unassignable	0
-85	-85: information not evaluable	0
-86	-86: inconclusive specification	0
-87	-87: multiple answers	0
-89	-89: illegible	0
-90	-90: no participation in survey wave	1870
-92	-92: no participation in survey module	1467
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	6284
-98	-98: don't know	92
-99	-99: not specified (refused to answer)	0

Waves: F2F 1; F2F 2; F2F 3; F2F 4; F2F 5
Generated variable
When analyzing the delinquency questions longitudinally, it must be taken into account that the question on delinquency in the face-to-face data collections from F2F3 onwards has been adapted to the extent that the questions 'Have you ever [...]' (variables **del*00*) ***are only asked to new survey participants. Panel participants are instead asked the question 'In the last 24 months, have you [...]' (variables del*04**). The subsequent question on the frequency of the respective behavior refers to the period of the last 12 months in F2F1 and F2F2 (**del*01*)*, ***and to the last 24 months in F2F3 (del*05**'). In CATI1, the question was asked as follows: 'In the last 12 months, have you [...]' (**del2***) but no frequencies were asked. Parents provided proxy statements about delinquent behavior of their children aged 9 or younger (**del2*[t,u,s]**) in CATI1 only.

When analyzing the delinquency questions longitudinally, it must be taken into account that the question on delinquency in the face-to-face data collections from F2F3 onwards has been adapted to the extent that the questions 'Have you ever [...]' (variables **del*00) are only asked to new survey participants. Panel participants are instead asked the question 'In the last 24 months, have you [...]' (variables del*04**). The subsequent question on the frequency of the respective behavior refers to the period of the last 12 months in F2F1 and F2F2 (**del*01), and to the last 24 months in F2F3 (del*05**'). In CATI1, the question was asked as follows: 'In the last 12 months, have you [...]' (**del2***) but no frequencies were asked. Parents provided proxy statements about delinquent behavior of their children aged 9 or younger (**del2*[t,u,s]**) in CATI1 only.

Generated variable

When analyzing the delinquency questions longitudinally, it must be taken into account that the question on delinquency in the face-to-face data collections from F2F3 onwards has been adapted to the extent that the questions 'Have you ever [...]' (variables **del*00) are only asked to new survey participants. Panel participants are instead asked the question 'In the last 24 months, have you [...]' (variables del*04**). The subsequent question on the frequency of the respective behavior refers to the period of the last 12 months in F2F1 and F2F2 (**del*01), and to the last 24 months in F2F3 (del*05**'). In CATI1, the question was asked as follows: 'In the last 12 months, have you [...]' (**del2***) but no frequencies were asked. Parents provided proxy statements about delinquent behavior of their children aged 9 or younger (**del2*[t,u,s]**) in CATI1 only.

Generated variable
When analyzing the delinquency questions longitudinally, it must be taken into account that the question on delinquency in the face-to-face data collections from F2F3 onwards has been adapted to the extent that the questions 'Have you ever [...]' (variables **del*00) are only asked to new survey participants. Panel participants are instead asked the question 'In the last 24 months, have you [...]' (variables del*04**). The subsequent question on the frequency of the respective behavior refers to the period of the last 12 months in F2F1 and F2F2 (**del*01), and to the last 24 months in F2F3 (del*05**'). In CATI1, the question was asked as follows: 'In the last 12 months, have you [...]' (**del2***) but no frequencies were asked. Parents provided proxy statements about delinquent behavior of their children aged 9 or younger (**del2*[t,u,s]**) in CATI1 only.

31 Locus of control and coping

This chapter contains information on: stress regulation and coping.

cis0100 – coping: task orientation: learn from mistakes (>= 16 yr)

1	1: does not apply at all	11
2	2: mostly does not apply	106
3	3: not sure	647
4	4: mostly applies	3917
5	5: totally applies	1416
-85	-85: information not evaluable	0
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	1870
-92	-92: no participation in survey module	1467
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	1156
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	0

Waves: F2F 2; F2F 4; F2F 5
Question text: Various types of behavior that people can use to respond to difficult, critical, or challenging events are listed below. Please indicate how well these statements describe how you deal with such events. [item text: I think about the event and learn from my mistakes.]
Filter based on instrument: module 'personality, political participation' (CAWI): (inlist(ptyp,1,2,110,120,200,300,400 & age0110>=16

-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	0
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	0

Waves: F2F 2; F2F 3; F2F 4; F2F 5
Question text:
Filter based on instrument: always asked/always generated
Generated variable
The variables **f2f** and **f2f_m*** indicate whether a person participated in F2F 1 overall (**f2f**) or in the single modules of F2F 1 and F2F 2 (**f2f_m***). Here it is irrelevant whether the person completed the module or dropped out in between.

f2f_mhh – participation hh questionnaire (gen)

0	0: not true	0
1	1: true	10577
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	0
-92	-92: no participation in survey module	13
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	0
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	0

Waves: F2F 2; F2F 3; F2F 4; F2F 5
Question text:
Filter based on instrument: always asked/always generated

Generated variable
The variables **f2f** and **f2f_m*** indicate whether a person participated in F2F 1 overall (**f2f**) or in the single modules of F2F 1 and F2F 2 (**f2f_m***). Here it is irrelevant whether the person completed the module or dropped out in between.

mod1002 – survey mode due pandemic (hh questionnaire)

1	1: in household of respondent(s) (CAPI, CASI)	0
2	2: telephone (CAPIbyPhone) or online (CAWI)	10577
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	0
-92	-92: no participation in survey module	13
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	0
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	0

Waves: F2F 4; F2F 5
Generated variable
Due to the Covid-19 pandemic, a new interview mode was introduced in F2F 4: CAPIbyPhone (Computer-Assisted Personal Interview by Phone). This means that face-to-face interviewers who were already known to the families conducted the CAPI part of the face-to-face interviews by telephone without any personal contact. The self-administered parts of the questionnaire, which had been administered as CASI (Computer-Assisted Self Interview) on a tablet in earlier face-to-face interviews, were administered online as CAWI (Computer-Assisted Web Interview) following the CAPIbyPhone interview.

mod1003 – survey mode due pandemic (individual questionnaire)

1	1: in household of respondent(s) (CAPI, CASI)	0
2	2: telephone (CAPIbyPhone) or online (CAWI)	8720
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	1870
-92	-92: no participation in survey module	0
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	0
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	0

Waves: F2F 4; F2F 5
Generated variable
Due to the Covid-19 pandemic, a new interview mode was introduced in F2F 4: CAPIbyPhone (Computer-Assisted Personal Interview by Phone). This means that face-to-face interviewers who were already known to the families conducted the CAPI part of the face-to-face interviews by telephone without any personal contact. 42 Interviewer assessments

This chapter contains information on: interviewer ratings about process of interview (household); interviewer ratings on the home environment (household).

iva0001 – who owns household (intr)

1	1: firstborn twin - t	0
2	2: secondborn twin - u	0
110	110: partner of first interviewed twin - p	0
120	120: partner of second interviewed twin - q	0
200	200: sibling - s	0
300	300: mother - m	0
400	400: father - f	0
500	500: partner of mother - g	0
600	600: partner of father - n	0
800	800: unknown person type	0
-87	-87: multiple answers	0
-90	-90: no participation in survey wave	1872
-92	-92: no participation in survey module	4144
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	4574
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	0

Waves: F2F 4
Generated variable
iva01, ***iva0500***, ***iva09***, **iva1000**: The interviewer was asked questions about the home and neighborhood where the interview took place following the last person interview. There are a few families that conduct all interviews in one location, although not all of these family members live in the same household. Since the location of the interview is not known, it is assumed that the interviewer was given information about the home and neighborhood of the last person interviewed. Accordingly, the information is assigned to all family members sharing the same household ID of the last person interviewed.
Item developed for TwinLife.

Question text: `Did other persons interfere in the interview?` [item text: `From the parents when interviewing the twins`]
Filter based on instrument: module 'interviewer' (CAPI-phone): mod1003==1
iva04, ***iva11***, **iva12**, ***iva13***: The interviewer was asked questions about the interview process or disturbances during the interview at the end of the last person interview in a household. The questions refer to the group of respondents interviewed by the interviewer that day. In some cases, however, interviewers had answered the same questions more than once. Since complete interviewer assessments may not be available until after the last individual interview, only this last information is retained. Exception to this rule: If there is more than one assessment for multiple households in a family on a given day, the information for each household is retained. As a result, the information is assigned to all persons in a family (or at the household level in exceptional cases) with the same interview date.
Engstler, H., Groh, A., Klaus, D., Mahne, K., Spuling, S., Wetzel, M., Wolff, J., & Tesch-Roemer, C. (2015). German Ageing Survey (DEAS): Instruments of the Fifth Wave 2014. [URL link]

iva01, ***iva0500***, ***iva09***, **iva1000**: The interviewer was asked questions about the home and neighborhood where the interview took place following the last person interview. There are a few families that conduct all interviews in one location, although not all of these family members live in the same household. Since the location of the interview is not known, it is assumed that the interviewer was given information about the home and neighborhood of the last person interviewed. Accordingly, the information is assigned to all family members sharing the same household ID of the last person interviewed.
Item developed for TwinLife.

iva0904 – description of the residential area (intr)

1	1: a residential area, predominantly old buildings	0
2	2: a residential area, predominantly new buildings	0
3	3: a residential area, a mix of new and old buildings	0
4	4: a mixed use area with apartments, shops and business establishments	0
5	5: a commercial center (shops, banks, administrative buildings) with a few apartments	0
6	6: a commercial or industrial area with a few apartments	0
-87	-87: multiple answers	0
-89	-89: no interviewer at location since HH moved or not participating	0

-90	-90: no participation in survey wave	1872
-92	-92: no participation in survey module	4144
-93	-93: unclear classification of system missing	0
-94	-94: technical error / faulty insertion	0
-95	-95: doesn't apply (screened out)	4574
-98	-98: don't know	0
-99	-99: not specified (refused to answer)	0

iva04, ***iva11***, **iva12**, ***iva13***: The interviewer was asked questions about the interview process or disturbances during the interview at the end of the last person interview in a household. The questions refer to the group of respondents interviewed by the interviewer that day. In some cases, however, interviewers had answered the same questions more than once. Since complete interviewer assessments may not be available until after the last individual interview, only this last information is retained. Exception to this rule: If there is more than

one assessment for multiple households in a family on a given day, the information for each household is retained. As a result, the information is assigned to all persons in a family (or at the household level in exceptional cases) with the same interview date.

iva1210 – technical problems during interview (intr)

1	1: yes (only CATI)	0
2	2: no	0
3	3: yes, often (only F2F)	4522
