

## ***TwinLife*: new data available!**

### **What is *TwinLife*?**

- DFG-funded long-term project
- *Aim*: The study of genetic and social causes of life chances and social inequality
- *Design*: genetically informative, longitudinal, cross-sequential Extended Twin Family Design
- Social inequality conceptualized as a multi-dimensional phenomenon including six inequality domains
- Detailed assessment of a variety of environmental factors

### **How do you get access to the data?**

The *TwinLife* dataset can be obtained via the GESIS Data Catalogue: <http://dx.doi.org/10.4232/1.13208>

- It contains data from the first household and the first telephone interviews
- Variables and instruments are documented here: <https://paneldata.org/twinlife>
- Further documentation is available under: <http://dx.doi.org/10.4232/1.13208> → Data & Documents
